

L Shape Carbon Galvanized Hot Dipped Galvanized Angle Iron In Container Delivery

Our Product Introduction

for more products please visit us on galvmetal.com

Basic Information

- Place of Origin: Hebei, China
- Certification: ISO9001
- Minimum Order Quantity: Negotiable
- Price: Negotiable
- Packaging Details: According to customer needs
- Delivery Time: 15-30 work days
- Payment Terms: TT

Product Specification

- Material: Carbon Steel
- Name: Angle Steel
- Shipment: Container Or As Your Request
- Surface: Mild Steel Plain
- Processing Services: Welding And Cutting
- Shape: L Shape
- Application: Construction, Machinery, Shipbuilding, Etc.
- Technology: Hot Dipped
- Texture Of Material: Q235
- Specifications: 100mm
- Highlight: I shape galvanized steel angle iron,
I shape hot dipped galvanized angle iron,
q235 galvanized steel angle iron

Product Description

Product Description:

The Galvanized L-Angle Steel is a versatile and durable material that can withstand harsh weather conditions and heavy loads. It is ideal for use in construction, manufacturing, and transportation industries. This steel product is available for shipment in containers or as per your request.

Our Galvanized L-Angle Steel is produced using advanced technology, either through the hot rolled or cold rolled process. Hot rolling involves heating the steel up to a certain temperature and then passing it through rollers to shape it into the desired angle. Cold rolling, on the other hand, involves passing the steel through rollers at room temperature.

One of the key features of our Galvanized L-Angle Steel is its surface treatment. The steel is coated with a layer of zinc through the galvanization process, which helps to protect it from corrosion and rust. This surface treatment also enhances the steel's appearance, giving it a shiny and appealing finish.

Technical Parameters:

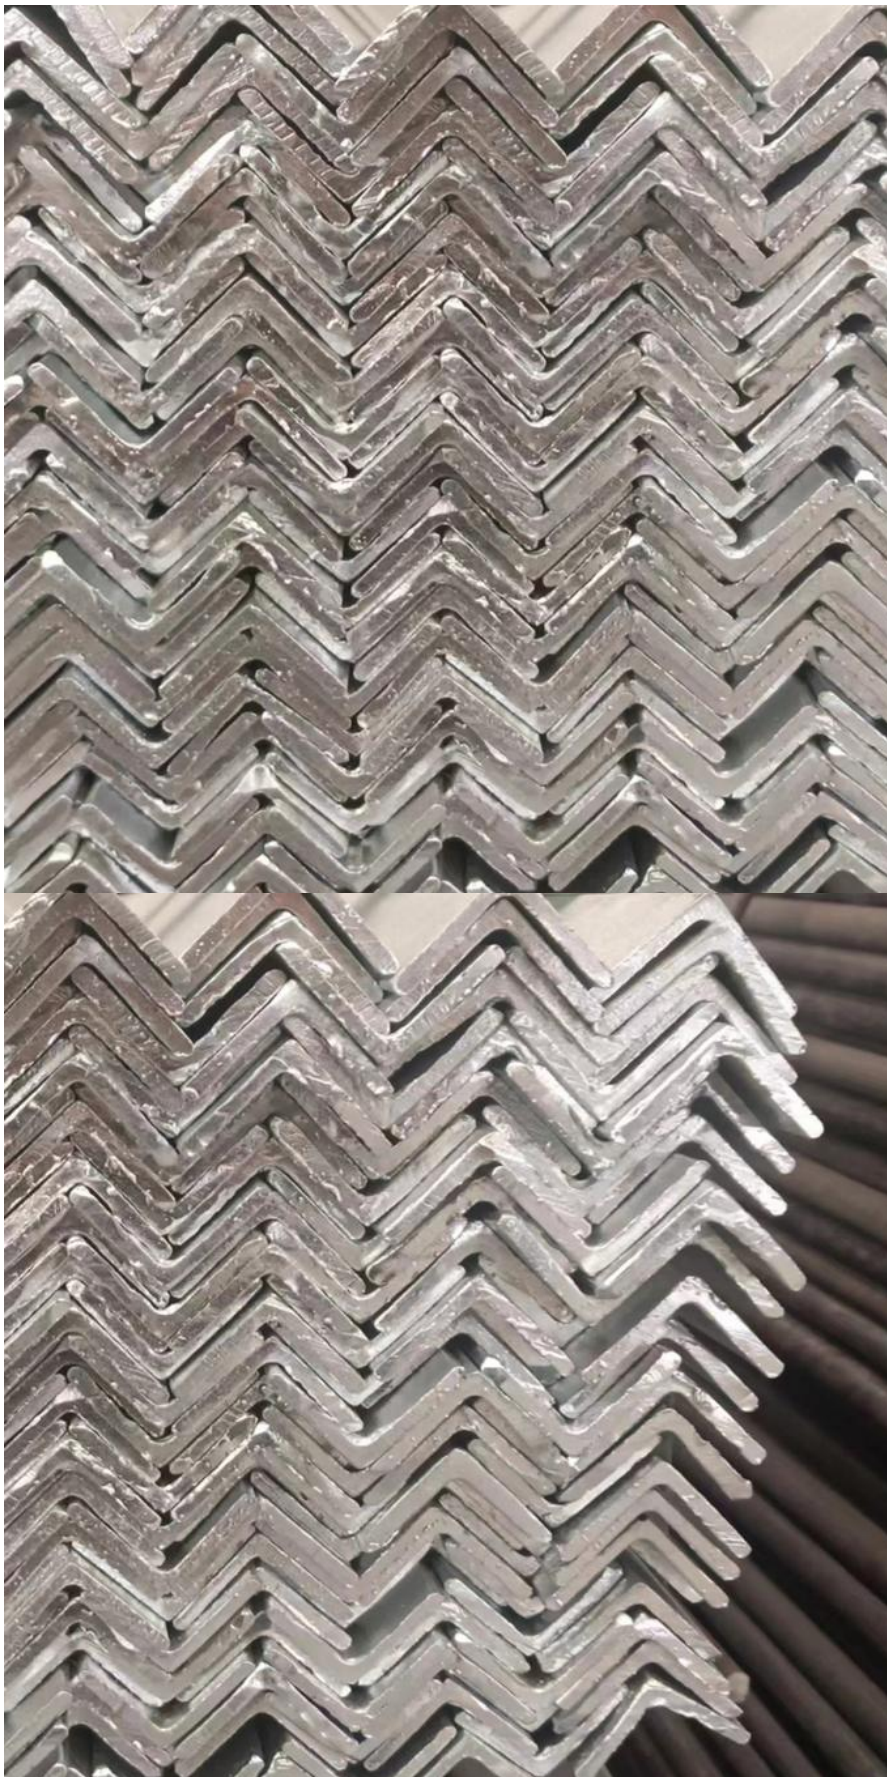

Attribute	Value
Shape	L Shape
Technology	Hot Rolled Or Cold Rolled
Shipment	Container Or As Your Request
Surface	Mild Steel Plain
Surface treatment	Galvanized
Quality	High Quality. Inspection
Production Capacity	5000 Tons Per Month
Name	Angle Steel
Processing services	Welding And Cutting
Technology	Hot Dipped

Applications:

Galvanized Angle Steel, also known as Low carbon equal angle steel, is a versatile and highly used product in various industries. It is a type of Hot-rolled galvanized steel product that is widely used in construction, machinery, shipbuilding, and other industries. The Galvanized L-Angle Steel is made from high-quality steel from Hebei, China, and is certified with ISO9001.

The Galvanized Angle Steel is widely used in construction for various purposes. It is used in the construction of bridges, pipelines, and other infrastructure projects. It is also used in the construction of buildings, such as commercial and residential buildings. The Galvanized Angle Steel is highly durable and can withstand harsh weather conditions, making it an ideal product for outdoor construction.

The Galvanized Angle Steel can be processed with welding and cutting services. It is available in various shapes, including L Shape. The Galvanized Angle Steel has a minimum order quantity that is negotiable, and the price is also negotiable. The packaging details are according to customer needs, and the delivery time is 15-30 work days. The payment terms are TT, making it an easy and convenient product to purchase.

Packing and Shipping:

Product Packaging:

Our Galvanized Angle Steel product is securely packaged in bundles or according to customer requirements. Each bundle is wrapped with high-quality waterproof material and securely fastened with steel straps. The bundles are then loaded onto pallets for easy handling and transportation.

Shipping:

We offer various shipping options based on customer requirements, including sea, air, or land transportation. Our products are shipped from our warehouse in secure containers to ensure safe delivery to our customers. We work with reputable shipping companies to ensure timely and efficient delivery of our products.

FAQ:

Q: What is Galvanized Angle Steel?

A: Galvanized Angle Steel is a type of steel that has been coated with a layer of zinc through a process called galvanizing. This process helps to protect the steel from rust and corrosion, making it more durable and long-lasting.

Q: Where is Galvanized Angle Steel produced?

A: Galvanized Angle Steel is produced in Hebei, China.

Q: Is the product certified?

A: Yes, the product is certified with ISO9001.

Q: What is the minimum order quantity?

A: The minimum order quantity is negotiable.

Q: What are the payment terms?

A: The payment terms are TT (Telegraphic Transfer).

Q: What is the delivery time?

A: The delivery time is 15-30 work days.

Q: What is the packaging method?

A: The packaging details are according to customer needs.

Q: Is the price negotiable?

A: Yes, the price is negotiable.
