Product Description

Product Description:

The Scaffolding Steel Post is perfect for a wide range of construction projects, providing excellent support for various types of structures. It is suitable for use in both small and large-scale projects, making it a versatile choice for contractors and construction companies.

Our Building Steel Prop comes with a load capacity of 1.5-3 tons, ensuring that it can handle heavy loads with ease. It is also customizable in length, allowing for a perfect fit in any construction project.

The Scaffolding Steel Post is also coated with a galvanized surface treatment, making it rust-resistant and able to withstand harsh weather conditions. This ensures that the product stays in excellent condition throughout its lifespan and provides reliable support for all construction projects.

Overall, our Scaffolding Steel Post is a must-have for any construction project, providing reliable and sturdy support for structures of all types and sizes. Its durability, load capacity, and customizable length make it a versatile choice for contractors and construction companies worldwide.

Applications:

Our Scaffolding Steel Post is designed to provide maximum support and stability on construction sites, making it an ideal choice for builders, contractors, and construction workers of all kinds. With adjustable heights ranging from 0.5 to 1.8 meters, this product is perfect for a variety of tasks and projects.

Whether you're looking for a Construction Steel Bracket to support heavy loads or a Building Steel Prop to provide added stability to your structures, our Scaffold Steel Support is the perfect solution. With a galvanized surface treatment that helps prevent rust and corrosion, this product is built to last for years to come.

So if you're looking for a reliable and high-quality scaffolding solution for your next construction project, be sure to check out our Scaffold Steel Support. With its adjustable height, galvanized surface treatment, and industrial design style, it's the perfect choice for builders and contractors of all kinds.

Packing and Shipping:

Product Packaging:

Each Scaffold Steel Support is individually wrapped in plastic to prevent scratches and other damage during transport.

All the steel supports are then placed in a sturdy cardboard box with adequate cushioning material to prevent movement during shipping.

Shipping:

The Scaffold Steel Supports will be shipped via ground transportation.

Standard shipping times apply, usually 3-5 business days within the United States.

International shipping is also available, but shipping times may vary depending on the destination.

Customers will receive a tracking number once their order has been shipped.
