

Professional Customization Soft/Full/Half Hard Carbon Steel Galvanized Flat Steel For Mold Steel

Our Product Introduction

for more products please visit us on galvmetal.com

Basic Information

- Place of Origin: Hebei, China
- Certification: ISO9001
- Minimum Order Quantity: Negotiable
- Price: Negotiable
- Packaging Details: According to customer needs
- Delivery Time: 15-30 work days
- Payment Terms: TT

Product Specification

- Hardness: Soft, Full Hard, Half Hard
- Zinc Coating: Customization
- Material: Carbon Steel
- Surface Treatment: Galvanized
- Length: Customization
- Special Use: Mold Steel
- Processing Service: Bending, Welding, Decoiling, Cutting, Punching
- Width: Customization
- Steel Grade: 2205 321 310S 303
- Highlight: **bending galvanized flat bar ,
cutting galvanized flat bar ,
bending galvanized flat steel**

Product Description

Product Description:

The zinc coating on our Galvanized Flat Iron Cold Drawn Steel can be customized to suit your specific needs. This coating helps to protect the steel from corrosion, which is especially important in construction and shipbuilding applications. The zinc coating also gives the product a shiny appearance, making it ideal for use in machinery and other decorative applications.

Our Galvanized Flat Iron Cold Drawn Steel can be customized to meet the width requirements of your project. This ensures that you get a product that fits your specific needs and reduces the amount of waste that is generated during production. This product is versatile and can be used in a variety of applications, including construction, machinery, shipbuilding, and more.

Overall, our Galvanized Flat Steel is a high-quality product that is perfect for a variety of applications. Its cold rolled technique and customized zinc coating make it strong, durable, and resistant to corrosion, while its non-alloy composition ensures that it performs well in a variety of environments. Whether you are working on a construction project, building machinery, or constructing a ship, our Galvanized Flat Steel is the perfect choice for your needs.

Features:

Galvanized Flat Steel is a versatile building bridge steel that is ideal for various applications in construction, machinery, shipbuilding, and more. It is a non-alloy cold rolled galvanized flat steel that is specially treated to resist rust and corrosion.

Galvanized Flat Iron Cold Drawn Steel is another name for this product, and it is known for its durability, strength, and reliability. It is widely used in the construction industry for making beams, frames, and other structural components. It is also used in the machinery industry for making gears, shafts, and other parts.

Technical Parameters:

Product Attribute	Technical Parameter
Product Name	Galvanized Flat Steel
Material	Carbon Steel
Length	Customization
Packing	In Bundles Or As Per Customer's Requirements
Alloy Or Not	Non-Alloy
Special Use	Mold Steel
Application	Construction, Machinery, Shipbuilding, Etc.
Surface Treatment	Galvanized
Processing Service	Bending, Welding, Decoiling, Cutting, Punching
Tolerance	±1%
Hardness	Soft, Full Hard, Half Hard
Product Type	Galvanized steel strip, Galvanized Flat Iron Cold Drawn Steel, Hot-Rolled Flat Steel

Applications:

Product Application Occasions and Scenarios

The versatility of galvanized flat steel makes it suitable for a wide range of applications. Here are some examples of where galvanized flat steel can be used:

Construction: Galvanized flat steel is commonly used in the construction industry for roofing, siding, and framing. The zinc coating on the steel provides protection against weathering and corrosion, making it ideal for outdoor applications.

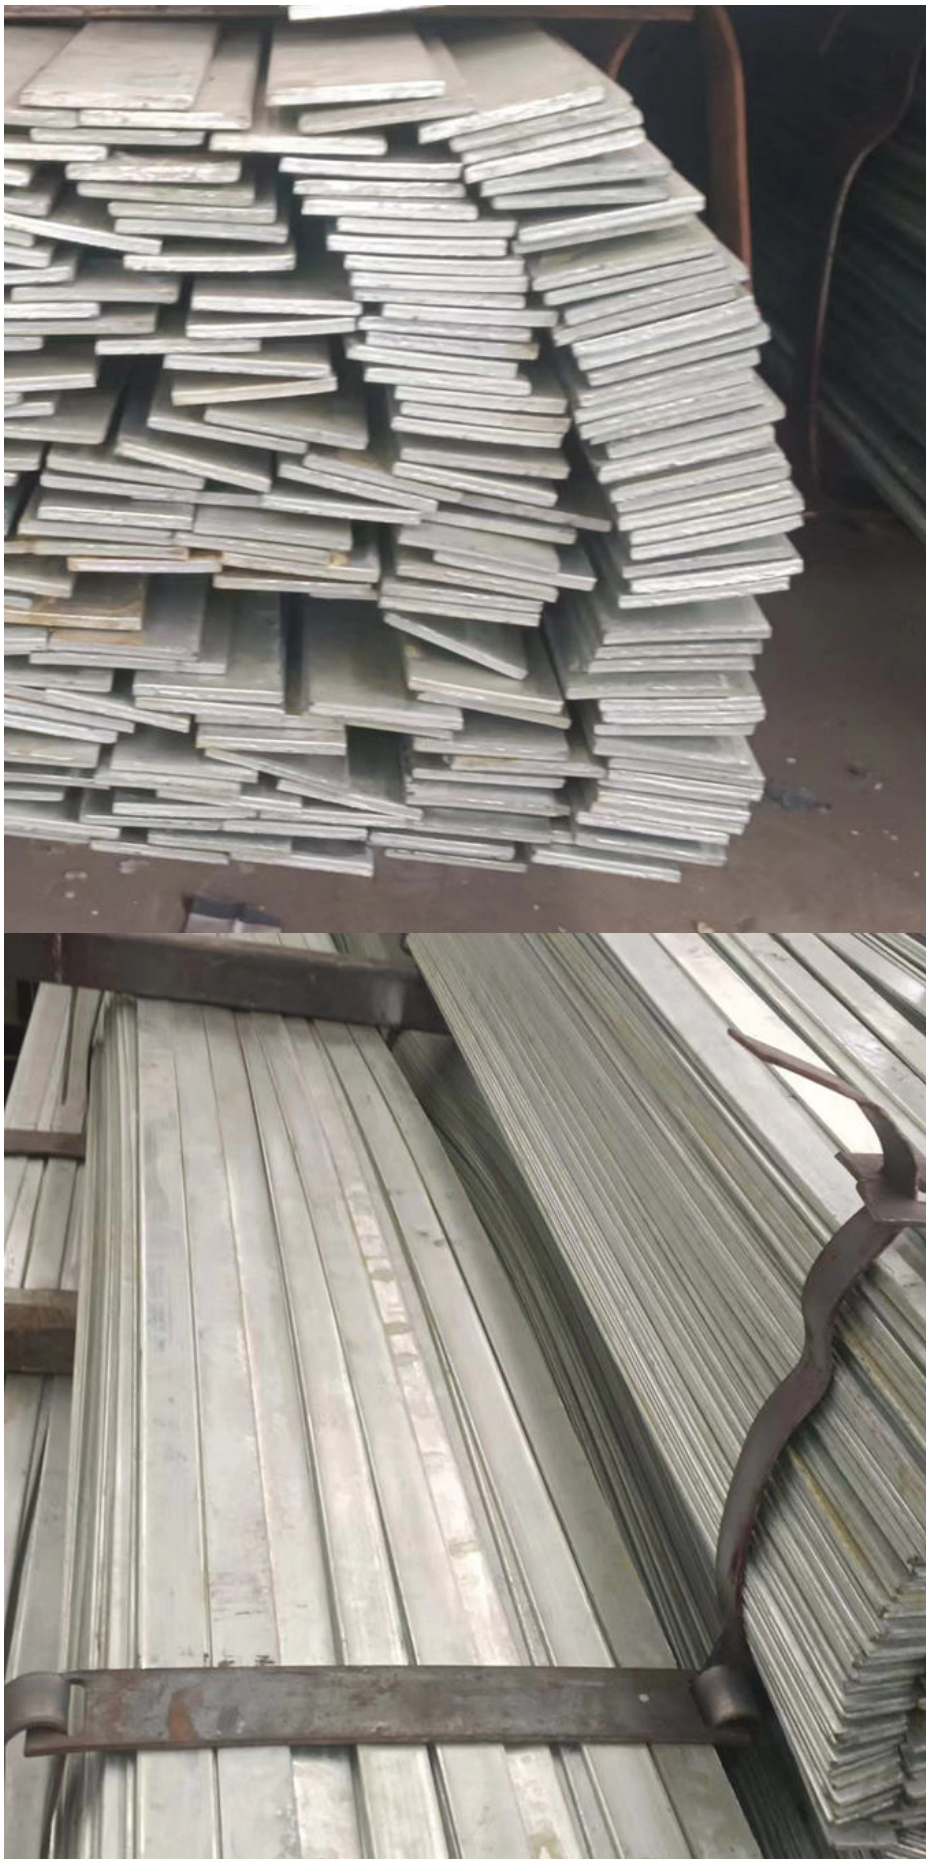

Manufacturing: Galvanized flat steel is also used in the manufacturing industry for a variety of products, including appliances, automotive parts, and industrial equipment. The steel's strength and durability make it a popular choice for these types of applications.

Transportation: Galvanized flat steel is used in the transportation industry for the production of trailers, trucks, and other vehicles. The steel's strength and resistance to corrosion make it ideal for use in these types of applications.

Mold Steel: Galvanized flat steel is also used in the production of mold steel. The steel's high strength and durability make it an ideal material for use in mold making.

Galvanized flat steel is widely used across various industries, and it is important to note that the product can be customized to meet specific needs. The width and zinc coating can be adjusted to fit specific applications. The product's tolerance is also ±1%, ensuring that it meets the required specifications.

Product Details

Packing and Shipping:

Product Packaging:

Our Galvanized Flat Steel product comes in bundles of 10 pieces, securely bound with steel bands and wrapped in protective plastic coverings to prevent any damage during transportation and storage.

Shipping:

We offer nationwide shipping for our Galvanized Flat Steel product. Our standard shipping option is via flatbed truck, and delivery times

may vary depending on your location and order quantity. For rush orders or special delivery requests, please contact our customer service team.

FAQ:

Q: What is Galvanized Flat Steel?

A: Galvanized Flat Steel is a type of steel that has been coated with a protective layer of zinc to prevent rusting and corrosion.

Q: Where is the Galvanized Flat Steel produced?

A: Our Galvanized Flat Steel is produced in Hebei, China.

Q: Does the Galvanized Flat Steel have any certification?

A: Yes, our Galvanized Flat Steel has ISO9001 certification.

Q: What is the minimum order quantity for Galvanized Flat Steel?

A: The minimum order quantity is negotiable.

Q: How are the Galvanized Flat Steel products packaged?

A: The packaging details are according to customer needs.

Q: What is the delivery time for Galvanized Flat Steel?

A: The delivery time for Galvanized Flat Steel is typically between 15-30 work days.

Q: What are the payment terms for Galvanized Flat Steel?

A: We accept payment through TT.

Q: What is the price for Galvanized Flat Steel?

A: The price for Galvanized Flat Steel is negotiable.
