

## Premium Non Alloy Galvanized Flat Steel for Mold Steel Applications

### Our Product Introduction

for more products please visit us on [galvmetal.com](http://galvmetal.com)

#### Basic Information

- Place of Origin: Hebei, China
- Certification: ISO9001
- Minimum Order Quantity: Negotiable
- Price: Negotiable
- Packaging Details: According to customer needs
- Delivery Time: 15-30 work days
- Payment Terms: TT

#### Product Specification

- Surface: Black
- Hardness: Soft, Full Hard, Half Hard
- Length: Customization
- Alloy Or Not: Non-Alloy
- Tolerance:  $\pm 1\%$
- Application: Construction, Machinery, Shipbuilding, Etc.
- Packing: In Bundles Or As Per Customer's Requirements
- Special Use: Mold Steel
- Steel Grade: Q195 Q235B 201 304
- Thickness: 10mm
- Width: 100mm
- Highlight: **non alloy galvanized flat steel,**

## Product Description

### Product Description:

This type of steel is customizable in terms of width and is available in a black surface finish. The cold-rolled based technique used to manufacture the Galvanized Flat Steel ensures that it is strong and durable enough to withstand the rigors of heavy-duty applications. The flat shape of the steel makes it ideal for use in applications where a smooth and flat surface is required.

The Galvanized Flat Steel is commonly used in the construction of buildings, bridges, and other structures that require a strong and durable material. Its excellent corrosion resistance makes it an ideal choice for use in areas that are exposed to the elements. The galvanized surface treatment also ensures that the steel has a long-lasting finish that will not easily fade or peel.

Overall, the Galvanized Flat Steel is a versatile and durable product that is suitable for use in a wide range of applications. Its galvanized surface treatment and cold-rolled based technique make it strong and corrosion-resistant, while its customizable width and black surface finish make it suitable for use in a variety of construction projects. Whether you are building a bridge, constructing a building, or working on a mold project, the Galvanized Flat Steel is a reliable and high-quality choice.

### Technical Parameters:

Parameter	Description
Special Use	Mold Steel
Hardness	Soft, Full Hard, Half Hard
Zinc Coating	Customization
Length	Customization
Width	Customization
Application	Construction, Machinery, Shipbuilding, Etc.
Technique	Cold Rolled Based
Surface	Black
Alloy Or Not	Non-Alloy
Tolerance	±1%

### Applications:

The special use of mold steel makes Galvanized Flat Iron Cold Drawn Steel ideal for use in the manufacturing of molds for various industries, including automotive, aerospace, and consumer goods. The surface of the material is black, which makes it easy to work with and modify as needed. The material is available in bundles or can be customized to meet the specific requirements of the customer, making it highly versatile and adaptable.

The product application occasions and scenarios for Galvanized Flat Iron Cold Drawn Steel are vast and varied. It can be used in the construction industry for the manufacture of buildings, bridges, and other structures. The manufacturing industry can use it for the production of molds for various industries, including automotive and aerospace. It can also be used in the production of consumer goods, such as appliances, furniture, and electronics. The versatility of the product makes it an excellent choice for any industry where strength, durability, and reliability are essential.

### **Packing and Shipping:**

#### **Product Packaging:**

Galvanized Flat Steel is packaged in bundles of 10-15 pieces

Each bundle is securely strapped with steel bands

Bundles are then wrapped with thick plastic wrapping to protect against moisture and damage during shipping

#### **Shipping:**

Galvanized Flat Steel is shipped via truck or rail  
Shipping times may vary depending on the destination  
All shipments are insured for the full value of the product  
Customers will be provided with tracking information once the product has shipped

---

## FAQ:

**Q:** What is Galvanized Flat Steel?

**A:** Galvanized Flat Steel is a type of steel that has been coated with a layer of zinc to protect it from corrosion. It is commonly used in construction, automotive, and manufacturing industries.

**Q:** Where is Galvanized Flat Steel produced?

**A:** Our Galvanized Flat Steel is produced in Hebei, China.

**Q:** Is your Galvanized Flat Steel certified?

**A:** Yes, our Galvanized Flat Steel is certified with ISO9001.

**Q:** What is the minimum order quantity for Galvanized Flat Steel?

**A:** The minimum order quantity for Galvanized Flat Steel is negotiable.

**Q:** What is the price of your Galvanized Flat Steel?

**A:** The price of our Galvanized Flat Steel is negotiable and will depend on the quantity ordered and other factors.

**Q:** What are your payment terms for Galvanized Flat Steel?

**A:** Our payment terms for Galvanized Flat Steel are TT.

**Q:** What is the delivery time for Galvanized Flat Steel?

**A:** The delivery time for Galvanized Flat Steel is typically 15-30 work days.

**Q:** How is Galvanized Flat Steel packaged for delivery?

**A:** Our Galvanized Flat Steel is packaged according to customer needs.
