

Customized Length Non Alloy Hot Rolled Flat Steel / 1095 Steel Flat Stock

Our Product Introduction

for more products please visit us on galvmetal.com

Basic Information

- Place of Origin: Hebei, China
- Certification: ISO9001
- Minimum Order Quantity: Negotiable
- Price: Negotiable
- Packaging Details: According to customer needs
- Delivery Time: 15-30 work days
- Payment Terms: TT

Product Specification

- Length: Customization
- Material: Carbon Steel
- Application: Construction, Machinery, Shipbuilding, Etc.
- Alloy Or Not: Non-Alloy
- Width: 12-300mm
- Packing: In Bundles Or As Per Customer's Requirements
- Special Use: Mold Steel
- Surface: Silvery
- Thickness: 4-60mm
- Highlight: **1095 Hot Rolled Flat Steel,
Non Alloy Hot Rolled Flat Steel,
1095 Steel Flat Stock**

Product Description

Product Description:

Galvanized Flat Iron Cold Drawn Steel is commonly used in construction, machinery, and shipbuilding applications due to its strength, durability, and resistance to corrosion. It is also used in the production of molds, making it a popular choice for mold steel.

Galvanized Flat Steel is available in a range of widths to suit the needs of different applications. Customization is also available to meet specific requirements.

The hardness of Galvanized Flat Steel can vary, with options including soft, full hard, and half hard. This allows for greater flexibility in application and ensures that the product can meet the needs of different projects.

When it comes to packaging, Galvanized Flat Steel can be provided in bundles or in accordance with the customer's requirements. This ensures that the product is delivered in a way that is convenient and efficient for the customer.

In summary, Galvanized Flat Steel is a versatile and durable product that is suitable for a range of applications. Its hot-dip galvanized coating provides excellent corrosion resistance, while its range of widths and hardness options make it a flexible choice for different projects. Whether you're working on a construction site, producing machinery, or building a ship, Galvanized Flat Steel is a reliable and effective choice.

Technical Parameters:

Product Attribute	Value
Product Name	Galvanized Flat Steel
Length	Customization
Surface	Black
Application	Construction, Machinery, Shipbuilding, Etc.
Packing	In Bundles Or As Per Customer's Requirements
Alloy Or Not	Non-Alloy
Zinc Coating	Customization
Surface Treatment	Galvanized
Special Use	Mold Steel
Processing Service	Bending, Welding, Decoiling, Cutting, Punching
Technique	Cold Rolled Based

Applications:

The galvanized flat steel can be used in many different scenarios and occasions. The product is commonly used in the construction industry for making decks, grating, and scaffolding. The product is also used in the automotive industry for making parts for cars and trucks. The product can be used in the manufacturing industry for making air conditioners, refrigerators, and other appliances. The product is also used in the agricultural industry for making fences and gates.

Hot-dipped galvanized flat steel is a high-quality product that is ideal for many different applications. The product is available in different processing services and can be customized according to customer needs. The product is also available in different hardness and length options. The galvanized coating provides excellent corrosion resistance, which makes it ideal for outdoor applications. The product is also very strong and durable, which makes it suitable for heavy-duty applications. Place your order today and get your hands on the best galvanized flat steel in the market!

Packing and Shipping:

Product Packaging:

Galvanized Flat Steel will be packed in bundles with steel strips.

The weight of each bundle will not exceed 3 tons.

The size of each bundle will be suitable for container loading.

Product Shipping:

Galvanized Flat Steel will be shipped by sea or by train.
All shipments will be loaded in containers or on flat racks.
We will provide all necessary documentation for customs clearance.

FAQ:

Q: What is Galvanized Flat Steel?

A: Galvanized Flat Steel is a type of steel that has been coated with a layer of zinc to protect it from rust and corrosion. It is commonly used in construction and industrial applications.

Q: Where is your Galvanized Flat Steel produced?

A: Our Galvanized Flat Steel is produced in Hebei, China.

Q: Does your Galvanized Flat Steel have any certifications?

A: Yes, our Galvanized Flat Steel is certified with ISO9001.

Q: What is the minimum order quantity for your Galvanized Flat Steel?

A: The minimum order quantity for our Galvanized Flat Steel is negotiable.

Q: What are your payment terms for Galvanized Flat Steel?

A: Our payment terms for Galvanized Flat Steel are TT (Telegraphic Transfer).

Q: What is the price for your Galvanized Flat Steel?

A: The price for our Galvanized Flat Steel is negotiable and depends on the quantity of your order.

Q: What are the packaging details for your Galvanized Flat Steel?

A: The packaging details for our Galvanized Flat Steel are according to customer needs.

Q: What is the delivery time for your Galvanized Flat Steel?

A: The delivery time for our Galvanized Flat Steel is 15-30 work days.
