

Customization Length Galvanized Flat Stock For Advanced Building Construction

Our Product Introduction

for more products please visit us on galvmetal.com

Basic Information

- Place of Origin: Hebei, China
- Certification: ISO9001
- Minimum Order Quantity: Negotiable
- Price: Negotiable
- Packaging Details: According to customer needs
- Delivery Time: 15-30 work days
- Payment Terms: TT

Product Specification

- Surface: Black
- Processing Service: Bending, Welding, Decoiling, Cutting, Punching
- Length: Customization
- Surface Treatment: Galvanized
- Packing: In Bundles Or As Per Customer's Requirements
- Material: Carbon Steel
- Technique: Cold Rolled Based
- Special Use: Mold Steel
- Thickness: 4-60mm
- Width: 12-300mm
- Highlight: **construction galvanized flat stock ,**

Product Description:

Our Galvanized Flat Steel product is manufactured using a cold-rolling process that delivers exceptional strength and durability. This technique ensures that our flat steel is of the highest quality and that it can withstand even the most demanding applications. We understand that precision is critical when it comes to steel products, which is why our Galvanized Flat Steel offers a tolerance of $\pm 1\%$. This level of accuracy ensures that you get the exact dimensions you need for your project every time. Our Galvanized Flat Steel is available in a range of customizable widths to meet your specific requirements. This flexibility means that you can choose the perfect size for your project, ensuring that you can get the job done right. So if you're looking for a top-quality Galvanized Flat Steel product that is perfect for use in mold steel applications, then you can't go wrong with our cold rolled galvanized flat steel. With its exceptional strength, accuracy, and durability, our Galvanized Flat Steel is the ideal choice for any project that demands the very best.

Features:

Galvanized Flat Steel is a type of non-alloy cold rolled steel that is commonly used in building bridges. It is available in customized lengths and can be packed in bundles or according to customer's requirements. It can be processed through various services such as bending, welding, decoiling, cutting, and punching. It is widely used in construction, machinery, shipbuilding, and many more applications.

Technical Parameters:

Technical Parameter	Specification
Product Name	Cold Rolled Galvanized Flat Steel
Length	Customization
Width	Customization
Processing Service	Bending, Welding, Decoiling, Cutting, Punching
Hardness	Soft, Full Hard, Half Hard
Special Use	Mold Steel
Surface Treatment	Galvanized
Tolerance	$\pm 1\%$
Zinc Coating	Customization
Technique	Cold Rolled Based
Surface	Black
Application	Building Bridge Steel

Applications:

This product is available in hot-dipped galvanized and cold-rolled galvanized options, providing customers with the flexibility to choose the best option for their specific needs. The zinc coating can be customized to provide additional protection against corrosion, ensuring that the steel remains in good condition even in harsh environments.

Galvanized flat steel is ideal for use in a variety of building and construction applications, including the construction of bridges and other infrastructure projects. The durability and strength of this material make it an ideal choice for these types of applications, providing long-lasting support and stability.

In addition to its use in building and infrastructure projects, galvanized flat steel can also be used in a variety of other applications, including the manufacturing of appliances, automotive components, and other consumer goods. The versatility of this product makes it a valuable addition to any manufacturing or construction project.

Customers can choose from a range of packaging options to suit their specific needs, with delivery times typically ranging from 15-30 work days. Payment terms are typically TT, providing a secure and reliable payment option for customers.

Packing and Shipping:

Product: Galvanized Flat Steel

Description: A durable and corrosion-resistant steel product that has been coated with a layer of zinc to protect against rust and other forms of corrosion.

Dimensions: 4 feet x 8 feet x 1/4 inch

Weight: 100 lbs

Packaging: The Galvanized Flat Steel will be packed securely in a wooden crate to prevent any damage during shipping.

Shipping: We offer free shipping for the Galvanized Flat Steel product to all locations within the United States. For international orders, please contact us for a shipping quote.

FAQ:

Q: What is Galvanized Flat Steel?

A: Galvanized Flat Steel refers to a type of flat steel that has been coated with a layer of zinc to prevent rusting and corrosion. This process of coating the steel with zinc is called galvanization.

Q: Where is Galvanized Flat Steel produced?

A: Our Galvanized Flat Steel is produced in Hebei, China.

Q: Is your Galvanized Flat Steel certified?

A: Yes, our Galvanized Flat Steel is certified with ISO9001.

Q: What is the minimum order quantity for Galvanized Flat Steel?

A: The minimum order quantity for Galvanized Flat Steel is negotiable.

Q: What are the payment terms for Galvanized Flat Steel?

A: The payment terms for Galvanized Flat Steel are TT (Telegraphic Transfer).

Q: What is the delivery time for Galvanized Flat Steel?

A: The delivery time for Galvanized Flat Steel is 15-30 work days.

Q: Can the packaging of Galvanized Flat Steel be customized?

A: Yes, the packaging details of Galvanized Flat Steel can be customized according to customer needs.

Q: Is the price of Galvanized Flat Steel negotiable?

A: Yes, the price of Galvanized Flat Steel is negotiable.
