

Hot Rolled Flat Carbon Steel Galvanized Steel Flat Bar With Customizable

Our Product Introduction

for more products please visit us on galvmetal.com

Basic Information

- Place of Origin: Hebei, China
- Certification: ISO9001
- Minimum Order Quantity: Negotiable
- Price: Negotiable
- Packaging Details: According to customer needs
- Delivery Time: 15-30 work days
- Payment Terms: TT

Product Specification

- Tolerance: $\pm 1\%$
- Width: Customization
- Application: Construction, Machinery, Shipbuilding, Etc.
- Alloy Or Not: Non-Alloy
- Surface: Black
- Material: Carbon Steel
- Surface Treatment: Galvanized
- Packing: In Bundles Or As Per Customer's Requirements
- Steel Grade: 321 310S 303
- Thickness: 40mm
- Highlight: hot rolled flat carbon steel,
customizable flat carbon steel,
customizable galvanized steel flat bar

Product Description

Product Description:

One of the special uses of galvanized flat steel is mold steel. This is because it is able to withstand high temperatures and is resistant to wear and tear. This makes it an ideal material for use in the production of molds for various industries, such as automotive, construction, and manufacturing.

The galvanized surface treatment is what gives this product its outstanding resistance to corrosion. The process of galvanization involves coating the steel with a layer of zinc, which provides a sacrificial layer that protects the underlying steel from rust and other forms of corrosion. This makes galvanized flat steel highly durable and long-lasting, even in harsh environments.

In conclusion, galvanized flat steel is a durable and reliable material that is ideal for a variety of applications. Whether you need cold rolled galvanized flat steel, hot-dipped galvanized flat steel, or any other type of galvanized flat steel product, we have the expertise and experience to deliver high-quality products that will meet your needs.

Technical Parameters:

Technical Parameter	Description
Product Name	Galvanized Flat Steel
Width	Customization
Technique	Cold Rolled Based
Surface	Black
Application	Construction, Machinery, Shipbuilding, Etc.
Surface Treatment	Galvanized
Zinc Coating	Customization
Processing Service	Bending, Welding, Decoiling, Cutting, Punching
Hardness	Soft, Full Hard, Half Hard
Tolerance	±1%
Packing	In Bundles Or As Per Customer's Requirements

Applications:

Cold rolled galvanized flat steel has many applications and is used in a wide range of scenarios. It is often used in construction for roofing, walls, and ceilings. It is also used in the automotive industry for body panels, fenders, and other parts. The product's surface is black, but it can be treated to achieve different finishes as per customer's requirements.

This product is available in different hardness levels, including soft, full hard, and half hard. This makes it suitable for a variety of applications, including as mold steel. Its technique of cold rolling ensures its high quality and durability. The product is packed in bundles or as per customer's requirements, making it easy to transport and store.

Packing and Shipping:

Product Packaging:

Galvanized flat steel will be securely packed in bundles.

The bundles will be wrapped with high-quality plastic sheets.

The wrapped bundles will be loaded onto wooden pallets.

The pallets will be strapped and wrapped with plastic for extra protection.

Shipping:

Galvanized flat steel will be shipped via truck or ocean freight depending on the destination.

Shipping charges will be calculated based on the weight and destination of the product.

Delivery times will vary depending on the shipping method and destination.

Customers will be provided with a tracking number to track their shipment.

FAQ:

Q: What is the place of origin for Galvanized Flat Steel?

A: The place of origin for Galvanized Flat Steel is Hebei, China.

Q: Is Galvanized Flat Steel certified?

A: Yes, Galvanized Flat Steel is certified with ISO9001.

Q: What is the minimum order quantity for Galvanized Flat Steel?

A: The minimum order quantity for Galvanized Flat Steel is negotiable.

Q: How much does Galvanized Flat Steel cost?

A: The price for Galvanized Flat Steel is negotiable.

Q: How is Galvanized Flat Steel packaged and what is the delivery time?

A: Galvanized Flat Steel is packaged according to customer needs, and the delivery time is typically 15-30 work days.

Q: What are the payment terms for Galvanized Flat Steel?

A: The payment terms for Galvanized Flat Steel are TT (Telegraphic Transfer).
