

Heavy Duty Galvanized Gal Steel Channel For Building Constructions 317 2205 Steel Grade 6.3# 63mm 40mm 4.8mm

Our Product Introduction

for more products please visit us on galvmetal.com

Basic Information

- Place of Origin: Hebei, China
- Certification: ISO9001
- Minimum Order Quantity: Negotiable
- Price: Negotiable
- Packaging Details: According to customer needs
- Delivery Time: 15-30 work days
- Payment Terms: TT

Product Specification

- Material: Galvanized Steel
- Length: Customization
- Shape: Channel
- Package: Standard Seaworthy Package
- Usage: Building Construction Materials
- Thickness: 1.5mm-5.0mm
- Processing Services: Include Bending, Welding, Punching, Uncoiling, And Cutting
- Application: Construction, Machinery, Shipbuilding, Etc.
- Steel Grade: 317 2205
- Highlight: **317 gal steel channel, 317 gal steel c channel, 2205 gal steel channel**

Product Description

Product Description:

With its galvanized surface treatment, this strut channel is highly resistant to corrosion, ensuring long-lasting durability and reliability. You won't have to worry about the channel rusting or deteriorating over time, no matter what type of project you're working on.

What sets this Galvanized Steel Strut Channel apart from other channel irons is its versatility. It can be used in a wide range of applications, including construction, machinery, shipbuilding, and more. This makes it a must-have for any builder or contractor who needs a reliable, durable channel iron for their projects.

In summary, the Galvanized Steel Strut Channel is a highly versatile and durable channel iron that is perfect for building construction materials. Its galvanized surface treatment ensures long-lasting corrosion resistance, making it suitable for use in both indoor and outdoor applications. Its processing services, which include bending, welding, punching, uncoiling, and cutting, make it easy to customize to your specific needs. Whether you're working on a construction project, machinery, or shipbuilding, this channel iron is the perfect solution.

Technical Parameters:

Shape	Channel
Perforated Or Not	Not Perforated
Thickness	1.5mm-5.0mm
Package	Standard Seaworthy Package
Name	U-shaped Channel Steel
Surface Treatment	Galvanized
Quality	100% Tested
Application	Construction, Machinery, Shipbuilding, Etc.
Usage	Building Construction Materials
Technique	Hot Rolled Steel Channel

Specifications	Height	Width	Thickness
5#	50	37	4.5
6.3#	63	40	4.8
8#	80	43	5.0
10#	100	48	5.3
12#	120	53	5.5
14#a	140	58	6.0
14#b	140	60	8

40#b	400	102	12.5
40#c	400	104	14.5

Applications:

The Zinc Plated Steel Channel is a versatile product that can be used in a variety of applications. It is commonly used in construction projects as a support beam or as a framing element. The Galvanized Channel Steel is also used in the manufacturing of metal buildings, bridges, and other structures. It is also used in the production of equipment and machinery, such as conveyor systems, automotive frames, and mining equipment.

Payment Terms for the Galvanized Channel Steel product are typically TT, which is a secure and reliable method of payment. The product is manufactured using Hot Rolled Steel Channel technique, which ensures that it is of high quality and meets all industry standards. The Shape of the product is Channel, which makes it easy to integrate into a variety of designs and structures.

In summary, the Galvanized Channel Steel product is a high-quality, versatile product that is widely used in various industries. It is made from high-quality Carbon steel C Channel Bar that is hot rolled and then galvanized to make it more durable and resistant to rust and corrosion. The product is manufactured in Hebei, China and has received ISO9001 certification, ensuring that it meets all quality and safety standards. The product is available in a range of thicknesses and lengths, and the Packaging Details can be customized to meet the specific needs of the customer. The Galvanized Channel Steel product is a reliable and cost-effective solution for a wide range of applications.

Packing and Shipping:

Product Packaging:

The galvanized channel steel will be securely packaged in bundles with steel straps.

The bundles will be covered with plastic sheets to protect the product from dust and moisture during transportation.

The bundles will be labeled with product information and handling instructions.

Shipping:

The galvanized channel steel will be shipped via truck or container, depending on the quantity.

The delivery will be arranged with the customer in advance.

The shipping cost will be calculated based on the distance and mode of transportation.

FAQ:

Q1: What is the place of origin of Galvanized Channel Steel?

A1: The Galvanized Channel Steel is from Hebei, China.

Q2: Does the Galvanized Channel Steel have any certification?

A2: Yes, the Galvanized Channel Steel has ISO9001 certification.

Q3: What is the minimum order quantity for Galvanized Channel Steel?

A3: The minimum order quantity for Galvanized Channel Steel is negotiable.

Q4: What is the price for Galvanized Channel Steel?

A4: The price for Galvanized Channel Steel is negotiable.

Q5: How is the Galvanized Channel Steel packaged and delivered?

A5: The Galvanized Channel Steel is packaged according to customer needs and delivered within 15-30 work days. Payment terms are TT.
