

Steel Galvanized U Channel For Building Construction U Shaped Steel Channel Sizes 8# 43mm 5mm

Our Product Introduction

for more products please visit us on galvmetal.com

Basic Information

- Place of Origin: Hebei, China
- Certification: ISO9001
- Minimum Order Quantity: Negotiable
- Price: Negotiable
- Packaging Details: According to customer needs
- Delivery Time: 15-30 work days
- Payment Terms: TT

Product Specification

- Package: Standard Seaworthy Package
- Material: Galvanized Steel
- Processing Services: Include Bending, Welding, Punching, Uncoiling, And Cutting
- Application: Construction, Machinery, Shipbuilding, Etc.
- Surface Treatment: Galvanized
- Name: U-shaped Channel Steel
- Usage: Building Construction Materials
- Perforated Or Not: Not Perforated
- Steel Grade: Q235B 201 304 316L 317 2205
- Highlight: **construction u shaped steel channel sizes ,
construction galvanized u channel ,
43mm galvanized u channel**

Product Description

Product Description:

The Galvanized Channel Steel has a thickness range of 1.5mm-5.0mm and is designed to cater to the needs of various construction applications like machinery, shipbuilding, and other construction projects. The product is built to last, and its Zinc Plated Steel Channel keeps it from rusting and corroding.

The Galvanized Metal U-Channel comes in a shape that is perfect for structural applications. The product's channel shape provides extra support, making it ideal for use as a beam or a support structure. Its strength-to-weight ratio is perfect for bearing heavy loads.

Our Galvanized Channel Steel is a versatile product that can be used in a variety of construction applications. It is perfect for use in building frames, supports, and other structural elements. It can also be used in the construction of bridges, highways, and other heavy-duty structures.

The Galvanized Channel Steel is easy to install, and its quality is ensured by our rigorous testing process. We take pride in providing our customers with high-quality products that meet their needs and exceed their expectations. Our Galvanized Channel Steel is one such product that delivers on both quality and performance.

Technical Parameters:

Material	Galvanized Steel
Name	U-shaped Channel Steel
Usage	Building Construction Materials
Thickness	1.5mm-5.0mm
Perforated Or Not	Not Perforated
Technique	Hot Rolled Steel Channel
Length	Customization
Surface Treatment	Galvanized
Package	Standard Seaworthy Package
Shape	Channel

Specifications	Height	Width	Thickness
18#a	180	68	7
18#b	180	70	9
20#a	200	73	7
20#b	200	75	9
22#a	220	77	7
22#b	220	79	9
25#a	250	78	7
25#b	250	80	9
25#c	250	82	11
28#a	280	82	7.5
28#b	280	84	9.5
28#c	280	86	11
30#a	300	85	7.5
30#b	300	87	9.5
30#c	300	89	11.5
32#a	320	88	8
32#b	320	90	10
32#c	320	92	12

36#a	360	96	9
36#b	360	98	11
36#c	360	100	13
40#a	400	100	10
40#b	400	102	12.5
40#c	400	104	14.5

Applications:

The Galvanized Channel Steel product is suitable for multiple applications and scenarios. It is commonly used in the construction industry for structural support, such as in the creation of steel frames, bridges, and tunnels. The corrosion-resistant properties of this product make it ideal for use in coastal areas, where saltwater can cause damage to untreated metals. Additionally, this product is often used in the manufacturing industry for machinery, equipment, and vehicles.

The Galvanized Channel Steel product has a thickness range of 1.5mm-5.0mm and is produced using the hot rolled steel channel technique. The surface treatment is galvanized, which provides an additional layer of protection against corrosion. This product is also available for processing services, including bending, welding, punching, uncoiling, and cutting, to meet specific customer requirements.

Packing and Shipping:

Product Packaging:

The Galvanized Channel Steel product will be packaged in bundles with steel strips and waterproof plastic sheets to protect it from rust and damage during transportation.

Shipping:

The product will be shipped via truck or ocean freight, depending on the customer's preference and location. It will be loaded and secured onto the transportation vehicle to ensure safe delivery. The shipping time will vary depending on the destination, but we will provide the customer with an estimated delivery time upon confirmation of their order.

FAQ:

Q1: What is Galvanized Channel Steel?

A1: Galvanized Channel Steel is a type of steel that has been hot-dip galvanized to improve its corrosion resistance. It is commonly used in construction projects as a structural support.

Q2: What is the place of origin of Galvanized Channel Steel?

A2: Our Galvanized Channel Steel is manufactured in Hebei, China.

Q3: Does Galvanized Channel Steel come with any certification?

A3: Yes, our Galvanized Channel Steel is certified with ISO9001, ensuring its quality and safety.

Q4: What is the minimum order quantity for Galvanized Channel Steel?

A4: The minimum order quantity for our Galvanized Channel Steel is negotiable, depending on the customer's specific needs.

Q5: What are the payment terms and delivery time for Galvanized Channel Steel?

A5: The payment terms for our Galvanized Channel Steel are TT, and the delivery time is typically 15-30 work days. The packaging details of the product can also be customized according to customer needs.
