

100% Tested Corrosion Resistant U Shaped Channel Steel Beam 316L Galvanized Hot Rolled

Our Product Introduction

for more products please visit us on galvmetal.com

Basic Information

- Place of Origin: Hebei, China
- Certification: ISO9001
- Minimum Order Quantity: Negotiable
- Price: Negotiable
- Packaging Details: According to customer needs
- Delivery Time: 15-30 work days
- Payment Terms: TT

Product Specification

- Perforated Or Not: Not Perforated
- Technique: Hot Rolled Steel Channel
- Usage: Building Construction Materials
- Length: Customization
- Application: Construction, Machinery, Shipbuilding, Etc.
- Thickness: 1.5mm-5.0mm
- Name: U-shaped Channel Steel
- Package: Standard Seaworthy Package
- Steel Grade: 316L
- Highlight: **corrosion resistant u shaped channel steel ,
316l u shaped channel steel ,
316l u shaped steel channel sizes**

Product Description

Product Description:

Our Carbon steel C Channel Bar is made from galvanized steel, which ensures that it is resistant to corrosion and rust. This makes it perfect for use in outdoor applications or in areas where it is exposed to moisture or chemicals. The galvanization process also provides an extra layer of protection, which extends the lifespan of the product.

In summary, our Galvanized Channel Steel is a strong, durable, and reliable product made from high-quality galvanized steel. It is available in various thicknesses, is not perforated, and is 100% tested to ensure its quality. If you're looking for a reliable and long-lasting structural support solution, look no further than our Zinc Plated Steel Channel.

Technical Parameters:

Parameter	Description
Name	Galvanized Metal U-Channel
Thickness	1.5mm-5.0mm
Material	Galvanized Steel
Surface Treatment	Galvanized
Shape	Channel
Perforated Or Not	Not Perforated
Technique	Hot Rolled Steel Channel
Usage	Building Construction Materials
Length	Customization
Application	Construction, Machinery, Shipbuilding, Etc.
Name	Galvanized Steel Strut Channel
Name	Galvanized Channel Metal

Specifications	Height	Width	Thickness
5#	50	37	4.5
6.3#	63	40	4.8
8#	80	43	5.0
10#	100	48	5.3
12#	120	53	5.5
14#a	140	58	6.0
14#b	140	60	8
16#a	160	63	6.5

32#b	320	90	10
32#c	320	92	12
36#a	360	96	9
36#b	360	98	11
36#c	360	100	13
40#a	400	100	10
40#b	400	102	12.5
40#c	400	104	14.5

Applications:

The Galvanized Channel Steel is commonly used in construction, machinery, shipbuilding, and other industries. It is a popular material for building frames, supports, and braces due to its strength and durability. It is also used in the automotive industry for chassis construction and in the manufacturing of industrial equipment.

Some of the specific application occasions and scenarios for the Galvanized Channel Steel include:

- Building frames, supports, and braces
- Chassis construction in the automotive industry
- Manufacturing of industrial equipment
- Supports for solar panels and other renewable energy systems
- Installation of cable trays and electrical conduits
- Supports for air conditioning and ventilation systems

In conclusion, the Galvanized Channel Steel, also known as Galvanized Steel Strut Channel, is a versatile and durable product that can be used in various industries for various applications. Its rust-proof and non-perforated properties make it ideal for outdoor and structural uses, while its high-quality standards ensure its reliability and longevity.

Packing and Shipping:

Product Packaging:

This Galvanized Channel Steel product is packaged securely in bundles with steel straps. Each bundle contains approximately 50 pieces of channel steel with a length of 6 meters. The bundles are then wrapped with plastic sheets to protect against moisture and damage during shipping.

Shipping:

We offer worldwide shipping for this product. Shipping costs will vary depending on the destination and quantity ordered. The estimated delivery time is 7-15 days from the date of order confirmation. We use reliable shipping carriers to ensure that your product arrives safely and on time.

FAQ:

Q: What is Galvanized Channel Steel?

A: Galvanized Channel Steel is a type of steel that has undergone a galvanization process, which involves coating the steel with a protective layer of zinc to prevent rusting and corrosion.

Q: Where is Galvanized Channel Steel made?

A: Our Galvanized Channel Steel is made in Hebei, China.

Q: Is the product certified?

A: Yes, our Galvanized Channel Steel is certified with ISO9001.

Q: What is the minimum order quantity for Galvanized Channel Steel?

A: The minimum order quantity for Galvanized Channel Steel is negotiable.

Q: What is the pricing of Galvanized Channel Steel?

A: The pricing of our Galvanized Channel Steel is negotiable.

Q: How is Galvanized Channel Steel packaged and delivered?

A: The packaging details for our Galvanized Channel Steel can be customized according to customer needs. The delivery time is typically 15-30 work days. Payment terms are TT.
