

304 1.5-5.0mm Galvanized Steel C Channel 50mm 4.5mm For Building Construction

Our Product Introduction

for more products please visit us on galvmetal.com

Basic Information

- Place of Origin: Hebei, China
- Certification: ISO9001
- Minimum Order Quantity: Negotiable
- Price: Negotiable
- Packaging Details: According to customer needs
- Delivery Time: 15-30 work days
- Payment Terms: TT

Product Specification

- Surface Treatment: Galvanized
- Length: Customization
- Shape: Channel
- Perforated Or Not: Not Perforated
- Package: Standard Seaworthy Package
- Technique: Hot Rolled Steel Channel
- Thickness: 1.5mm-5.0mm
- Quality: 100% Tested
- Steel Grade: 304
- Highlight: **galvanized steel c channel 4.5mm, 304 50mm galvanised c channel, Building galvanised c channel 50mm**

Product Description

Product Description:

Our Galvanized Channel Metal is not perforated, making it ideal for use in building construction materials. You can customize the length according to your specific needs, ensuring a perfect fit for your project.

The surface treatment of our Galvanized Channel Steel is galvanized, which provides an additional layer of protection against corrosion. This treatment involves coating the steel with a layer of zinc, which creates a barrier between the metal and the surrounding environment. As a result, our Galvanized Channel Steel is highly resistant to rust and other forms of corrosion, making it an excellent choice for outdoor applications.

Whether you're building a new structure or renovating an existing one, our Galvanized Channel Steel is an excellent choice for your construction needs. Its durability, corrosion resistance, and customizable length make it a versatile and reliable option that you can count on for years to come.

Technical Parameters:

Quality	100% Tested
Usage	Building Construction Materials
Name	U-shaped Channel Steel
Perforated Or Not	Not Perforated
Application	Construction, Machinery, Shipbuilding, Etc.
Material	Galvanized Steel
Technique	Hot Rolled Steel Channel
Package	Standard Seaworthy Package
Processing services	Include Bending, Welding, Punching, Uncoiling, And Cutting
Surface Treatment	Galvanized

Specifications	Height	Width	Thickness
5#	50	37	4.5
6.3#	63	40	4.8
8#	80	43	5.0

Applications:

The Galvanized Metal U-Channel is widely used in the construction industry for various purposes such as framing, support, and reinforcement of structures. It provides excellent resistance to corrosion and rust, making it a durable and long-lasting solution. The product is also used in the machinery industry for manufacturing different kinds of equipment and machinery. The Galvanized Metal U-Channel is an ideal material for the production of conveyor systems, storage racks, and shelving units. It is a cost-effective and high-quality solution that meets the needs of different industries.

The Galvanized Metal U-Channel is also used in the shipbuilding industry for various applications such as constructing ship frames, decks, and bulkheads. The product's high strength and durability make it an ideal material for the harsh marine environment. It provides excellent corrosion resistance and can withstand the harsh weather conditions and saltwater environment. The Galvanized Metal U-Channel is a preferred choice of material for shipbuilders and naval architects.

Packing and Shipping:

Product Packaging:

Galvanized Channel Steel will be packed in bundles with steel strips and plastic caps. The bundles will be securely tied with metal straps to prevent any damage during transportation. The packaging will be labeled with product information and handling instructions.

Shipping:

The Galvanized Channel Steel will be shipped by sea or by land, depending on the quantity and destination. The shipping process will be arranged by our logistics team, who will ensure timely delivery and proper handling of the product. We will provide the customer with tracking information and updates on the status of the shipment.

FAQ:

Q1: Where is the Galvanized Channel Steel produced?

A1: Our Galvanized Channel Steel is produced in Hebei, China.

Q2: What certification does the Galvanized Channel Steel have?

A2: Our Galvanized Channel Steel is certified with ISO9001.

Q3: What is the minimum order quantity for Galvanized Channel Steel?

A3: The minimum order quantity for Galvanized Channel Steel is negotiable.

Q4: How is the pricing for Galvanized Channel Steel determined?

A4: The pricing for Galvanized Channel Steel is negotiable and is determined based on the quantity ordered and other factors.

Q5: What are the packaging and delivery details for Galvanized Channel Steel?

A5: The packaging for Galvanized Channel Steel is according to customer needs. The delivery time is 15-30 work days and payment terms are TT.
