

Customization Length Hot Rolled Channel Steel For Building Construction Galvanised U Channel

Our Product Introduction

for more products please visit us on galvmetal.com

Basic Information

- Place of Origin: Hebei, China
- Certification: ISO9001
- Minimum Order Quantity: Negotiable
- Price: Negotiable
- Packaging Details: According to customer needs
- Delivery Time: 15-30 work days
- Payment Terms: TT

Product Specification

- Thickness: 1.5mm-5.0mm
- Length: Customization
- Technique: Hot Rolled Steel Channel
- Processing Services: Include Bending, Welding, Punching, Uncoiling, And Cutting
- Shape: Channel
- Package: Standard Seaworthy Package
- Usage: Building Construction Materials
- Application: Construction, Machinery, Shipbuilding, Etc.
- Steel Grade: 201
- Highlight: **201 hot rolled channel steel, galvanized metal channel 4.8mm, 201 galvanised u channel**

Product Description

Product Description:

The Galvanized Metal U-Channel is corrosion-resistant, making it perfect for use in harsh environments. The galvanizing process adds a layer of protection to the steel, making it resistant to rust and corrosion. This product is designed to stand up to the toughest conditions, making it ideal for use in construction, machinery, and shipbuilding.

The Galvanized Channel Steel is a versatile product that can be used in a wide variety of applications. It is easy to install and can be used for everything from framing to shelving. It is a cost-effective solution that provides exceptional strength and durability.

Overall, the Galvanized Channel Steel is a high-quality product that is perfect for anyone who needs a strong and reliable building material. It is a non-perforated channel shape that is perfect for construction, machinery, shipbuilding, and other applications. It is made of high-quality carbon steel that is 100% tested to ensure its durability and strength. It is also corrosion-resistant, making it ideal for use in harsh environments.

Technical Parameters:

Product Name	U-shaped Channel Steel
Material	Galvanized Steel
Surface Treatment	Galvanized
Thickness	1.5mm-5.0mm
Quality	100% Tested
Usage	Building Construction Materials
Application	Construction, Machinery, Shipbuilding, Etc.
Perforated Or Not	Not Perforated
Package	Standard Seaworthy Package
Processing Services	Include Bending, Welding, Punching, Uncoiling, And Cutting

Specifications	Height	Width	Thickness
5#	50	37	4.5
6.3#	63	40	4.8
8#	80	43	5.0
10#	100	48	5.3

40#a	400	100	10
40#b	400	102	12.5
40#c	400	104	14.5

Applications:

The Galvanized Channel Steel is versatile in its application and can be used in many different scenarios. The most common areas it is used for are construction, machinery, and shipbuilding due to its strength and durability. The galvanized channel metal is also commonly used in outdoor environments where it can be exposed to harsh weather conditions.

The material used in the production of Galvanized Channel Steel is galvanized steel, which means that it has been coated with a layer of zinc to protect it from rust and other forms of corrosion. This makes it ideal for use in areas where it may come into contact with moisture or other corrosive substances.

In summary, Galvanized Channel Steel is a versatile and durable material that can be used in many different applications. Its corrosion-resistant properties make it ideal for use in outdoor environments and areas where it may come into contact with moisture or other corrosive substances.

Packing and Shipping:

Product Packaging:

The galvanized channel steel will be packaged in bundles secured with steel straps. Each bundle will have a maximum weight of 3 metric tons. The bundles will be wrapped with plastic sheets to protect them from moisture and damage during transportation.

Shipping:

The galvanized channel steel will be shipped via sea freight. The delivery time will depend on the destination, but the estimated time of arrival will be provided upon confirmation of the order. We ensure that the product will be delivered in good condition and within the agreed timeframe.

FAQ:

Here are some frequently asked questions and answers about our Galvanized Channel Steel product:

Q: Where is the Galvanized Channel Steel produced?

A: The Galvanized Channel Steel is produced in Hebei, China.

Q: Is the Galvanized Channel Steel certified?

A: Yes, it is certified with ISO9001.

Q: What is the minimum order quantity for this product?

A: The minimum order quantity for this product is negotiable.

Q: What is the price of the Galvanized Channel Steel?

A: The price of the Galvanized Channel Steel is negotiable.

Q: What are the packaging details and delivery time for this product?

A: The packaging details for the Galvanized Channel Steel are according to customer needs. The delivery time is usually 15-30 work days.

Q: What are the payment terms for this product?

A: The payment terms for the Galvanized Channel Steel are TT.
