

Customizable Galvanized Sheet Metal Channel / Galvanized Metal U Channel For Heavy Duty Construction

Our Product Introduction

for more products please visit us on galvmetal.com

Basic Information

- Place of Origin: Hebei, China
- Certification: ISO9001
- Minimum Order Quantity: Negotiable
- Price: Negotiable
- Packaging Details: According to customer needs
- Delivery Time: 15-30 work days
- Payment Terms: TT

Product Specification

- Length: Customization
- Technique: Hot Rolled Steel Channel
- Package: Standard Seaworthy Package
- Material: Galvanized Steel
- Perforated Or Not: Not Perforated
- Shape: Channel
- Processing Services: Include Bending, Welding, Punching, Uncoiling, And Cutting
- Name: U-shaped Channel Steel
- Steel Grade: 201 304 316L
- Highlight: **construction galvanized metal u channel ,
construction galvanized sheet metal channel ,
201 galvanized metal u channel**

Product Description

Product Description:

The technique used in manufacturing Galvanized Channel Metal involves hot rolling the steel to form a C shape, which makes it perfect for applications that require structural support. The technique also results in a product that is durable and resistant to wear and tear, making it ideal for use in construction and heavy machinery.

Galvanized Channel Metal is treated with a surface treatment that involves coating the surface with zinc. The Zinc Plated Steel Channel provides an added layer of protection against rust and corrosion. This makes it perfect for use in areas that are exposed to the elements, such as construction sites and shipbuilding yards.

Galvanized Channel Steel can be customized according to your desired length, making it perfect for projects that require specific measurements. This feature ensures that you get the exact length you need for your project, without having to waste any material.

The standard seaworthy package used to package Galvanized Channel Steel ensures that it is protected during transport and handling. This makes it easy to transport the product from one location to another without worrying about damage.

In summary, Galvanized Channel Steel is a versatile and durable construction material that is ideal for use in various applications, including construction, machinery, and shipbuilding. Its surface treatment with zinc provides an added layer of protection against rust and corrosion, making it perfect for use in areas that are exposed to the elements. The customization feature ensures that you get the exact length you need for your project, while the standard seaworthy package ensures that the product is protected during transport and handling.

Technical Parameters:

Quality	100% Tested
Perforated Or Not	Not Perforated
Surface Treatment	Galvanized
Application	Construction, Machinery, Shipbuilding, Etc.
Length	Customization
Material	Galvanized Steel
Name	U-shaped Channel Steel
Processing services	Include Bending, Welding, Punching, Uncoiling, And Cutting
Thickness	1.5mm-5.0mm
Package	Standard Seaworthy Package

Specifications	Height	Width	Thickness
5#	50	37	4.5
6.3#	63	40	4.8
8#	80	43	5.0
10#	100	48	5.3
12#	120	53	5.5
14#a	140	58	6.0
14#b	140	60	8
16#a	160	63	6.5
16#b	160	65	8.5
18#a	180	68	7
18#b	180	70	9
20#a	200	73	7
20#b	200	75	9
22#a	220	77	7
22#b	220	79	9
25#a	250	78	7
25#b	250	80	9

25#c	250	82	11
28#a	280	82	7.5
28#b	280	84	9.5
28#c	280	86	11
30#a	300	85	7.5

Applications:

The Galvanized Channel Steel product is not perforated, and its length can be customized according to your specific needs. The surface treatment of this product is galvanized, which provides excellent corrosion resistance in harsh environments. Whether you are building a new structure, repairing an existing one, or working on a machinery project, Galvanized Channel Steel is an excellent choice for structural support. Its versatility and strength make it ideal for use in a variety of situations. Overall, Galvanized Channel Steel is an excellent product for use in a wide range of applications. Whether you are in construction, machinery, or shipbuilding, this product is an excellent choice for structural support. Its high-quality Carbon steel C Channel Bar construction and galvanized surface treatment make it a durable and long-lasting choice for your project.

Packing and Shipping:

Product Packaging:

The galvanized channel steel will be packaged in bundles with steel straps.

The bundle weight will range from 1 to 5 metric tons.

The bundles will be securely fastened and wrapped with plastic sheets.

Shipping:

The galvanized channel steel will be shipped via ocean freight.

Delivery time will vary based on the destination, but will typically take 4-6 weeks.

Customers will be provided with a shipping tracking number once the product has been dispatched.

FAQ:

Q: What is the place of origin of the Galvanized Channel Steel?

A: The Galvanized Channel Steel is made in Hebei, China.

Q: What certification does the Galvanized Channel Steel have?

A: The Galvanized Channel Steel is certified with ISO9001.

Q: What is the minimum order quantity for the Galvanized Channel Steel?

A: The minimum order quantity for the Galvanized Channel Steel is negotiable.

Q: What is the price of the Galvanized Channel Steel?

A: The price of the Galvanized Channel Steel is negotiable.
Q: What are the packaging details of the Galvanized Channel Steel?
A: The packaging details of the Galvanized Channel Steel are according to customer needs.
Q: What is the delivery time for the Galvanized Channel Steel?
A: The delivery time for the Galvanized Channel Steel is 15-30 work days.
Q: What are the payment terms for the Galvanized Channel Steel?
A: The payment terms for the Galvanized Channel Steel are TT.
