

## Corrosion Resistant Steel Plate Embedded In Concrete For Diverse Applications

Our Product Introduction

for more products please visit us on [galvmetal.com](http://galvmetal.com)

### Basic Information

- Place of Origin: Hebei, China
- Certification: ISO9001
- Minimum Order Quantity: Negotiable
- Price: Negotiable
- Packaging Details: According to customer needs
- Delivery Time: 15-30 work days
- Payment Terms: TT

### Product Specification

- Package Contents: 1 Rear Embedded Part
- Durability: High
- Corrosion Resistance: Yes
- Installation Method: Punching Installation
- Waterproof: Yes
- Size: Standard
- Material: Metal
- Flexibility: No
- Highlight: **corrosion resistant steel plate embedded in concrete**  
**, diverse embed steel plate in concrete,**  
**diverse steel plate embedded in concrete**

## Product Description

### Product Description:

The Embedded Parts Rear comes in a sleek black color that complements any machinery assembly. It is designed to blend in seamlessly with your equipment, providing a clean and professional look. The black color is also resistant to fading, ensuring that it will maintain its color even after long-term use.

In addition to its sleek design, the Embedded Parts Rear is also highly durable. It is built to withstand heavy use and can handle even the toughest machinery assembly tasks. This product is perfect for industrial and commercial machinery that requires a high level of durability and strength.

The Embedded Parts Rear comes with a package containing one Rear Embedded Part. This package is perfect for those who need to replace or upgrade their current rear embedded parts. The package is also easy to install and can be done quickly and efficiently.

Our Embedded Parts Rear also boasts corrosion resistance, making it perfect for machinery that is used in harsh environments. The product is designed to resist corrosion and rust, ensuring that it will last for years to come.

The Embedded Parts Rear also has excellent heat resistance. It can withstand high temperatures without warping or deforming, making it ideal for machinery that is exposed to extreme heat.

In conclusion, our Rear Embedded Parts are an essential addition to any machinery assembly. With its sleek black color, high durability, corrosion resistance, and heat resistance, this product is built to last and provide dependable support for your machinery. Get your Rear Embedded Parts today and experience the difference it can make in your equipment!

### Technical Parameters:

Product Name	Embedded Parts Rear
Compatibility	Universal
Material	Metal
Size	Standard
Heat Resistance	Yes
Waterproof	Yes
Shockproof	Yes
Installation Method	Punching Installation
Weight	Standard
Package Contents	1 Rear Embedded Part

### Applications:

The embedded parts can be used in a variety of scenarios and occasions. They are perfect for construction sites where they can be used as rear embedded parts for concrete walls. They can also be used in buildings where they can be installed to provide shockproof support. The punching installation method ensures that they can be easily installed in any location.

The black color of the embedded parts allows them to blend in with their surroundings and not be a visual distraction. They are also resistant to corrosion, making them durable and long-lasting. The standard weight of the embedded parts ensures that they will not add unnecessary weight to the structure they are supporting.

Overall, our non-prefabricated embedded parts are a reliable choice for any construction or building project. Their durability and ease of installation make them a great investment for any customer. For more information or to place an order, please contact us.

### **Packing and Shipping:**

#### **Product Packaging:**

Our Embedded Parts product is carefully packaged to ensure its safe delivery to your doorstep. Each part is individually wrapped in protective material and placed in a sturdy box to prevent any damage during transit.

#### **Shipping:**

We offer fast and reliable shipping options for our Embedded Parts product. Once your order is processed, it will be shipped out within 1-2 business days. Depending on your location, delivery can take anywhere from 3-7 business days. We also provide tracking information so

you can stay updated on the status of your shipment.

---

### FAQ:

**Q:** Where are the Embedded Parts manufactured?

**A:** The Embedded Parts are manufactured in Hebei, China.

**Q:** Is the ISO9001 certification available for the Embedded Parts?

**A:** Yes, the Embedded Parts are ISO9001 certified.

**Q:** What is the minimum order quantity for the Embedded Parts?

**A:** The minimum order quantity for the Embedded Parts is negotiable.

**Q:** Is the price for the Embedded Parts negotiable?

**A:** Yes, the price for the Embedded Parts is negotiable.

**Q:** How are the Embedded Parts packaged and delivered?

**A:** The Embedded Parts are packaged according to customer needs and delivered within 15-30 work days. Payment can be made through TT.
