

## Heavy Duty Standard Weight Embedded Parts Universal Black Rectangular Embed Plates

### Our Product Introduction

for more products please visit us on [galvmetal.com](http://galvmetal.com)

#### Basic Information

- Place of Origin: Hebei, China
- Certification: ISO9001
- Minimum Order Quantity: Negotiable
- Price: Negotiable
- Packaging Details: According to customer needs
- Delivery Time: 15-30 work days
- Payment Terms: TT

#### Product Specification

- Shape: Customized
- Compatibility: Universal
- Warranty: 1 Year
- Country Of Origin: China
- Size: Small
- Function: Support And Fixation
- Color: Black
- Weight: Standard
- Thickness: 4mm 6mm
- Highlight: **embedded parts universal, rectangular embed plates, standard embed plates**

## Product Description

### Product Description:

Each package includes 10 pieces of our Small Embedded Parts, providing you with sufficient quantity for your construction projects. At our company, we take pride in the quality of our products which is why we offer a 1-year warranty on our Embedded Plates. Rest assured that you are getting a high-quality product that is built to last.

Our Embedded Parts are designed to be incorporated into concrete structures to provide added strength and support. They are perfect for use in building foundations, walls, and other concrete structures.

Whether you are a professional contractor or a DIY enthusiast, our Basic Embedded Parts are an essential component for your construction projects. Order now and experience the convenience and reliability of our Embedded Plates In Concrete.

### Technical Parameters:

|                     |                       |
|---------------------|-----------------------|
| Shape               | Rectangular           |
| Warranty            | 1 Year                |
| Size                | Small                 |
| Material            | Steel                 |
| Weight              | Standard              |
| Compatibility       | Universal             |
| Color               | Black                 |
| Package Contents    | 10 Pieces             |
| Installation Method | Embedded              |
| Application         | Building Construction |

### Applications:

The embedded plates in concrete product is designed to be compatible with any construction project that requires support and fixation. The product's universal compatibility makes it suitable for a wide range of applications in various construction projects. It is mainly used in concrete structures and is particularly useful in reinforcing concrete beams. The embedded plates in concrete are also used in the construction of buildings, bridges, and other infrastructure projects.

These plates are black in color and are packaged according to the customer's needs. The delivery time for the product is typically between 15 to 30 days, and payment terms are TT. The product's primary function is to provide support and fixation for concrete structures. It is an essential product that is used in construction projects worldwide.

The embedded plates in concrete product is suitable for a wide range of application occasions and scenarios. It is commonly used in the construction of high-rise buildings, commercial properties, bridges, tunnels, and other infrastructure projects. The product is also widely used in the construction of large-scale industrial buildings, such as factories and warehouses. The metal embedded parts are particularly useful in reinforcing concrete beams and are often used in combination with other reinforcement materials to provide additional strength and support.

### Packing and Shipping:

#### Product Packaging:

The embedded plates in concrete product will be packaged in sturdy cardboard boxes with foam padding to prevent any damage during transportation. Each box will contain a set of embedded plates along with installation instructions.

#### Shipping:

The embedded plates in concrete product will be shipped via a reputable courier service that provides tracking information. Shipping costs will be calculated based on the destination and weight of the package. Customers can expect their order to arrive within 5 to 7 business days from the date of shipping.

---

### FAQ:
