

Customization U Type Halfen Channel 21mm With 4.5kN Load Capacity And Class 4 Corrosion Resistance

Our Product Introduction

for more products please visit us on galvmetal.com

Basic Information

- Place of Origin: Hebei, China
- Certification: ISO9001
- Minimum Order Quantity: Negotiable
- Price: Negotiable
- Packaging Details: According to customer needs
- Delivery Time: 15-30 work days
- Payment Terms: TT

Product Specification

- Thickness: Customization
- Load Capacity: 4.5kN
- Width: Customization
- Length: Customization
- Application: Concrete Structures, Industrial Buildings, Bridges, Etc.
- Shape: U-type
- Height: 21mm
- Corrosion Resistance: Class 4
- Steel Grade: Q235B 201 304
- Thread Pitch: 13|20|28
- Highlight: **halfen channel 21mm, u type halfen channel, customization halfen track**

Product Description

Product Description:

One of the main benefits of the Halfen Channel is its processing service, which is welding. This means that the product can be easily welded onto other steel components to create a strong and durable connection.

Another advantage of the Halfen Channel is its customization options. The width and thickness of the product can be tailored to meet the specific requirements of the application. This allows for more precise and efficient installation, as well as greater flexibility in design. The weight of the Halfen Channel is based on its size and thickness, which can be customized to fit the specific requirements of the project.

Overall, the Halfen Channel is a reliable and versatile construction component that offers many benefits to its users. Its processing service of welding, customization options for width and thickness, and installation types of welded or bolted make it a great choice for various applications. Plus, its Halfen Groove design allows for the mounting of high strength embedded parts, adding even more strength and durability to the overall structure.

Technical Parameters:

Product Attribute	Value
Product Name	Halfen Channel
Load Capacity	4.5kN
Surface Treatment	Hot-dip Galvanized
Material	Galvanized Steel
Application	Concrete Structures, Industrial Buildings, Bridges, Etc.
Corrosion Resistance	Class 4
Surface Treatment	Smooth
Processing Service	Welding
Fire Resistance	Class A1
Thickness	Customization
Width	Customization
Product Name	Halfen Groove

Applications:

The Halfen Channel is a U-shaped embedded part that is used in construction projects where high-strength concrete connections are required. It is designed to fit into a Halfen groove, which is a specialized channel that is cast into the concrete. The Halfen Channel is then placed into this groove and secured with bolts to provide a strong and secure connection.

The Halfen Channel is suitable for a variety of applications, including the construction of buildings, bridges, and other infrastructure projects. It is particularly useful in situations where high-strength embedded parts are required to support heavy loads or withstand extreme forces.

In summary, the Halfen Channel is a high-strength embedded part that is suitable for a wide range of applications. It is manufactured in Hebei, China, and certified by ISO9001. With its hot-dip galvanized surface treatment, it has excellent corrosion resistance and is designed to fit into a Halfen groove. It can be customized in thickness and weight and is suitable for use in construction projects where high-strength concrete connections are required.

Packing and Shipping:

Product Packaging:

The Halfen Channel product comes in a sturdy cardboard box with foam padding to ensure the product is protected during transportation. Each box contains 10 pieces of the Halfen Channel product.

Shipping:

Orders of the Halfen Channel product are processed within 24 hours of purchase. We offer free shipping to all locations within the United States. International shipping is also available for an additional fee. Delivery times may vary depending on the destination.

FAQ:

Q: What is the Halfen Channel?

A: The Halfen Channel is a steel channel used for connecting and anchoring various construction elements, such as façade elements, window sills, and concrete façades.

Q: Where is the Halfen Channel produced?

A: The Halfen Channel is produced in Hebei, China.

Q: What certifications does the Halfen Channel have?

A: The Halfen Channel is certified with ISO9001, ensuring its quality meets international standards.

Q: What is the minimum order quantity for the Halfen Channel?

A: The minimum order quantity for the Halfen Channel is negotiable, depending on customer needs.

Q: What is the price of the Halfen Channel?

A: The price of the Halfen Channel is negotiable, depending on the quantity ordered and other factors.

Q: How is the Halfen Channel packaged?

A: The Halfen Channel is packaged according to customer needs, ensuring safe delivery and protection of the product during transportation.

Q: What is the delivery time for the Halfen Channel?

A: The delivery time for the Halfen Channel is typically 15-30 work days, depending on the quantity ordered and customer location.

Q: What are the payment terms for the Halfen Channel?

A: The payment terms for the Halfen Channel are TT (Telegraphic Transfer), ensuring secure and timely payment for both the buyer and seller.
