

L Shape Angle Iron Galvanised With Welding And Cutting Services 1.91kg/M Theoretical Weight

Our Product Introduction

for more products please visit us on galvmetal.com

Basic Information

- Place of Origin: Hebei, China
- Certification: ISO9001
- Minimum Order Quantity: Negotiable
- Price: Negotiable
- Packaging Details: According to customer needs
- Delivery Time: 15-30 work days
- Payment Terms: TT

Product Specification

- Production Capacity: 5000 Tons Per Month
- Shipment: Container Or As Your Request
- Technology: Hot Dipped
- Shape: L Shape
- Material: Carbon Steel
- Surface Treatment: Galvanized
- Quality: High Quality. Inspection
- Processing Services: Welding And Cutting
- Theoretical Weight: 1.91kg/m
- Highlight: **I shape angle iron galvanised, welding galvanised angle, welding angle iron galvanised**

Product Description

Product Description:

The Galvanized Angle Steel is available in both hot-rolled and cold-rolled versions. Hot-rolled galvanized steel is created by heating the steel to high temperatures and then rolling it into the desired shape. This process results in a product that is strong and durable, but also has a rougher surface texture. Cold-rolled galvanized steel, on the other hand, is created by rolling the steel at lower temperatures. This results in a product that is smoother and more precise, but also somewhat less strong than its hot-rolled counterpart.

One popular variety of Galvanized Angle Steel is the Slotted cold drawn angle steel. This version of the product is created by drawing the steel through a die to create slots or perforations in the surface. This makes the product ideal for use in applications where ventilation or drainage is needed, such as in construction or industrial settings.

In addition to its versatility and durability, Galvanized Angle Steel also offers a range of processing services. These include welding and cutting, which can be used to create customized shapes and designs for specific applications. This allows the product to be tailored to meet the unique needs of a wide range of industries and applications.

Overall, Galvanized Angle Steel is a reliable and high-quality product that is well-suited for use in a variety of industries and applications. Whether you need a strong and durable material for construction or industrial use, or a more precise and tailored product for a specific application, Galvanized Angle Steel is a versatile and reliable choice that is sure to meet your needs.

Technical Parameters:

Shape	L Shape
Production Capacity	5000 Tons Per Month
Surface	Mild Steel Plain
Name	Angle Steel
Technology	Hot Dipped
Processing Services	Welding And Cutting
Shipment	Container Or As Your Request
Application	Construction, Machinery, Shipbuilding, Etc.
Surface Treatment	Galvanized
Quality	High Quality. Inspection

Applications:

The Galvanized Angle Steel product is available in L shape and can be used for a variety of applications and scenarios. One of the most common applications for this product is in the construction industry, where it is used for framing, support, and reinforcement in buildings, bridges, and other structures. The Galvanized L-Angle Steel product is also commonly used in the manufacturing of machinery and equipment, where it provides a strong and durable framework for the equipment.

The Coated L-Shaped Iron product is also used in the transportation industry, where it is used in the construction of trailers, trucks, and other vehicles. The product is also used in the marine industry, where it is used for the construction of ships, boats, and other watercraft. The product is also used in the agricultural industry, where it is used for the construction of fences, gates, and other farm equipment.

In conclusion, the Galvanized Angle Steel product is a versatile and durable product that is suitable for various applications and scenarios. The product is produced in Hebei, China, and is certified with ISO9001 certification, ensuring that it meets the highest quality standards. The product can be customized using processing services such as welding and cutting, and can be shipped in containers or as per the customer's request. The minimum order quantity and pricing are negotiable depending on the order quantity and delivery location, making this product a cost-effective option for a wide range of customers.

Packing and Shipping:

Product Packaging:

This Galvanized Angle Steel product will be securely packaged in a sturdy cardboard box to prevent any damage during shipping. The product will be wrapped in protective material to ensure it arrives in perfect condition.

Shipping:

We offer free standard shipping for this product in the United States. Orders will be processed within two business days and shipped via ground shipping. Expedited shipping options are available for an additional fee.

FAQ:

Q: Where is the Galvanized Angle Steel produced?

A: The Galvanized Angle Steel is produced in Hebei, China.

Q: Does the Galvanized Angle Steel have any certification?

A: Yes, the Galvanized Angle Steel has ISO9001 certification.

Q: What is the minimum order quantity for the Galvanized Angle Steel?

A: The minimum order quantity for the Galvanized Angle Steel is negotiable.

Q: What is the price of the Galvanized Angle Steel?

A: The price of the Galvanized Angle Steel is negotiable.

Q: How is the Galvanized Angle Steel packaged and delivered?

A: The Galvanized Angle Steel is packaged according to customer needs and delivered within 15-30 work days. Payment terms are TT.
