

## Tensile Strength Steel H Beam With 50mm-400mm Flange H Beam Steel Structure

### Our Product Introduction

for more products please visit us on [galvmetal.com](http://galvmetal.com)

#### Basic Information

- Place of Origin: Hebei, China
- Certification: ISO9001
- Minimum Order Quantity: Negotiable
- Price: Negotiable
- Packaging Details: According to customer needs
- Delivery Time: 15-30 work days
- Payment Terms: TT

#### Product Specification

- Size: Customization
- Length: 6-12m
- Grade: Q235B, Q345B, SS400, A36, A572 Gr50, S235JR, S355JR
- Material: Carbon Steel
- Flange Width: 50-400mm
- Flange Thickness: 7-34mm
- Shape: H-shaped Cross-section
- Application: Construction, Bridge, Machinery, Equipment Foundation, Support, Etc.
- Highlight: **400mm flange h beam, tensile steel h beam, tensile flange h beam**

## Product Description

### Product Description:

One of the main advantages of the H-Beam is its ability to support heavy loads over long spans. This makes it an ideal choice for building structures such as bridges, buildings, and industrial facilities. The H-Beam can withstand extreme weather conditions and provides a stable and secure framework for any construction project.

The H-Beam is made from carbon steel, which is known for its strength and durability. The material is also resistant to corrosion, making it ideal for use in harsh environments. The H-Beam is available in a range of sizes and can be customized to meet specific project requirements.

In summary, the H-Beam is a versatile and reliable sectional steel beam that is ideal for a variety of construction projects. Its strength, durability, and ability to support heavy loads make it a popular choice among builders and construction professionals. Whether used in bridges, buildings, or industrial facilities, the H-Beam provides a stable and secure framework that can withstand the toughest weather conditions.

### Technical Parameters:

Application	Construction, Bridge, Machinery, Equipment Foundation, Support, Etc.
Size	Customization
Flange Thickness	7-34mm
Packing	In Bundles Or As Required
Flange Width	50-400mm
Shape	H-shaped Cross-section
Thickness	5-34mm
Material	Carbon Steel
Length	6-12m
Grade	Q235B, Q345B, SS400, A36, A572 Gr50, S235JR, S355JR

### Applications:

One of the most common applications of the H-Beam is as a structural support in large buildings and bridges. Due to its shape, the H-Beam is able to support heavy loads and provide stability to the structure. It is also used in the construction of industrial plants, warehouses, and other large structures.

The H-Beam is available in a range of sizes and can be customized to meet specific project requirements. It has a length of 6-12m and a flange thickness of 7-34mm. The H-Beam is made from high-quality carbon steel, which makes it durable and long-lasting.

In summary, the H-Beam, or H Sectional Beam, is a versatile and widely used sectional steel beam that is ideal for a variety of applications. Its unique H-shaped cross-section provides stability and support, making it a popular choice in the construction and manufacturing industries. With its place of origin in Hebei, China, and its certification by ISO9001, the H-Beam is a reliable and high-quality product that can be customized to meet specific project requirements.

### **Packing and Shipping:**

#### **Product Packaging:**

The H-Beam product will be securely packaged in wooden crates to prevent damage during transportation.

The crates will be labeled with the product name, dimensions, and weight for easy identification.

Each crate will contain a packing list and installation instructions for the customer's reference.

#### **Shipping:**

The H-Beam product will be shipped via container vessel or truck, depending on the customer's location and preference.  
The shipping cost will be calculated based on the product weight, dimensions, and destination.  
The customer will be provided with a tracking number to monitor the shipment's status.

---

**FAQ:**

**Q: Where is the H-Beam product made?**

A: The H-Beam product is made in Hebei, China.

**Q: Does the H-Beam product come with certification?**

A: Yes, the H-Beam product is certified with ISO9001.

**Q: What is the minimum order quantity for the H-Beam product?**

A: The minimum order quantity for the H-Beam product is negotiable.

**Q: How much does the H-Beam product cost?**

A: The price for the H-Beam product is negotiable.

**Q: How is the H-Beam product packaged and delivered?**

A: The H-Beam product is packaged according to customer needs and delivery time is usually 15-30 work days. Payment terms are TT.
