

H Beam Iron Construction A36 Q235B I Beams For Buildings Galvanised Steel H Beam

Our Product Introduction

for more products please visit us on galvmetal.com

Basic Information

- Place of Origin: Hebei, China
- Certification: ISO9001
- Minimum Order Quantity: Negotiable
- Price: Negotiable
- Packaging Details: According to customer needs
- Delivery Time: 15-30 work days
- Payment Terms: TT

Product Specification

- Flange Thickness: 7-34mm
- Shape: H-shaped Cross-section
- Thickness: 5-34mm
- Grade: Q235B, Q345B, SS400, A36, A572 Gr50, S235JR, S355JR
- Size: Customization
- Length: 6-12m
- Application: Construction, Bridge, Machinery, Equipment Foundation, Support, Etc.
- Packing: In Bundles Or As Required
- Highlight: **h beam iron construction, buildings galvanised steel h beam, construction galvanised steel h beam**

Product Description:

The H Beam is characterized by its H-shaped cross-section, which gives it excellent load-bearing properties and stability. It is commonly used in the construction of buildings, bridges, and other structures that require support over long spans.

The surface treatment of the H Beam can be customized to suit the specific needs of the project. It can be galvanized, painted, or left untreated, depending on the level of corrosion resistance required. This makes it a versatile and adaptable choice for a range of construction projects.

Overall, the H Sectional Steel Beam is a reliable and sturdy choice for any construction project that requires a strong and stable structural beam. Its customizable size, material, and surface treatment options make it a versatile choice for a range of applications, from small-scale residential projects to large-scale commercial constructions.

Technical Parameters:

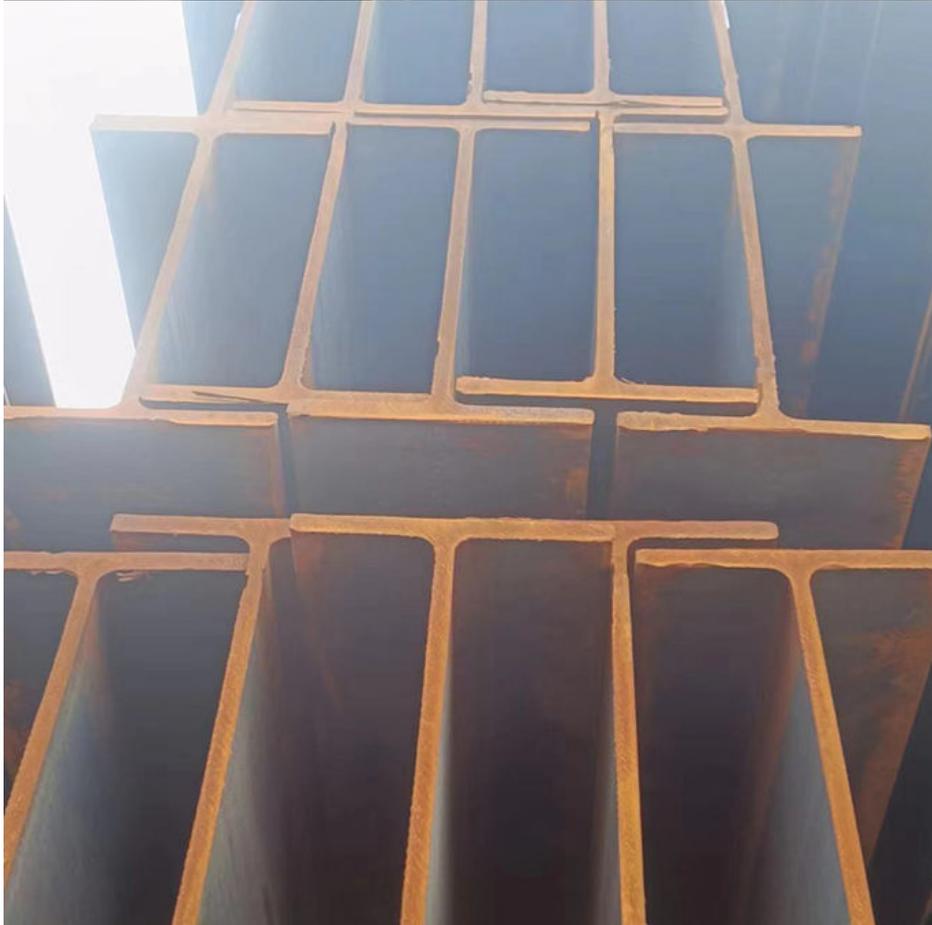

Product Attribute	Value
Sectional Steel Beam Type	H Sectional Steel Beam
Flange Thickness	7-34mm
Flange Width	50-400mm
Shape	H-shaped Cross-section
Size	Customization
Material	Carbon Steel
Surface Treatment	Galvanized, Painted, Or As Required
Application	Construction, Bridge, Machinery, Equipment Foundation, Support, Etc.
Thickness	5-34mm
Length	6-12m

Applications:

The H Beam, also known as H Sectional Beam, is a highly versatile product that is widely used in various construction projects. It is a structural beam made of steel and has a cross-section in the shape of the letter H. This product is produced in Hebei, China and is ISO9001 certified, ensuring that it meets international quality standards.

The H Beam has a minimum order quantity that is negotiable, as well as a negotiable price. Its packaging details are flexible and can be tailored according to customer needs. The delivery time for this product is typically 15-30 work days. Payment terms are TT.

If you are looking for a reliable and versatile structural beam for your project, the H Beam is an excellent choice. Contact us today to discuss your specific needs and to receive a customized quote.

Packing and Shipping:

Product Packaging:

The H-Beam product will be packaged securely in wooden crates to prevent any damage during transportation. The crates will be sealed to ensure the product arrives in good condition.

Shipping:

The H-Beam product will be shipped via a reliable freight carrier to the customer's designated location. The shipping cost will be calculated based on the weight and distance of the shipment.

FAQ:
