Basic Information

- Place of Origin: Hebei, China
- Certification: ISO9001
- Minimum Order Quantity: Negotiable
- Price: Negotiable
- Packaging Details: According to customer needs
- Delivery Time: 15-30 work days
- Payment Terms: TT

Product Specification

- Features: High Strength, Easy To Install, Corrosion Resistant
- Surface Treatment: Galvanized
- Adjustable Height: 0.5-1.8 Meters
- Length: Customization
- Surface Smoothness: Hot Dip Galvanizing
- Package: Steel Pallet Or As Per Customer's Request
- Diameter: Customization
- Load Capacity: 1.5-3 Tons
- Highlight: **galvanized scaffolding post, galvanized adjustable steel post shores, adjustable scaffolding post**

Product Description

Product Description:

The surface treatment of this steel prop is galvanized, which provides added protection and increases the lifespan of the product. The surface smoothness is achieved through the process of hot dip galvanizing. This process ensures a smooth and even surface, making it easy to handle and install.

Our Scaffold Steel Support product comes in customizable lengths, making it suitable for a wide range of applications. Whether you need a construction steel bracket for a large-scale project, or building steel prop for a smaller job, we've got you covered.

In summary, our Scaffold Steel Support product is an ideal choice for anyone in need of a high-quality, durable, and customizable support system. With its galvanized surface treatment, hot dip galvanizing, and industrial design style, it is sure to meet all your requirements. So whether you need a building steel prop, construction steel bracket, or scaffolding steel post, look no further than our Scaffold Steel Support product.

Features:

This Scaffold Steel Support is a versatile and durable product that can be used for a variety of purposes. It is also known as a Scaffolding Steel Post, Construction Steel Bracket, or Prop Scaffolding. The galvanized surface treatment ensures that it can withstand harsh weather conditions and resist corrosion.

Technical Parameters:

Package	Steel Pallet Or As Per Customer's Request
Usage	Supporting Scaffolding System
Length	Customization
Diameter	Customization
Surface smoothness	Hot Dip Galvanizing
Adjustable Height	0.5-1.8 Meters
Application	Construction Industry
Surface Treatment	Galvanized
Features	High Strength, Easy To Install, Corrosion Resistant
OEM Service	Available

Applications:

Prop Scaffolding is necessary for any construction project where scaffolding is used. The Scaffold Steel Support is used to support and stabilize the scaffolding system, providing a safe and secure platform for workers to perform their tasks. This product is suitable for a wide range of building types and applications, including residential, commercial, and industrial buildings.

The Scaffold Steel Support is perfect for occasions where a reliable and robust support tool is needed. It is ideal for scenarios where the scaffolding system needs to be elevated to a certain height to complete the construction project. This product is also useful when renovating or repairing existing buildings, allowing workers to access hard-to-reach areas with ease.

Overall, the Scaffold Steel Support is an essential product in the construction industry. Its strength, durability, and adjustable height range make it an ideal choice for supporting scaffolding systems in a wide range of building types and applications.

Packing and Shipping:

Product Packaging:

Each scaffold steel support will be packed in a sturdy cardboard box.

The box will have cushioning material to prevent any damage during transportation.

Shipping:

The product will be shipped via a reliable courier service.

Shipping charges will be calculated based on the destination and weight of the package.

The estimated delivery time is 3-5 business days.
