Product Description

Product Description:

The Wall Formwork Tie is a type of Hardware Flat Tie that is made from high-quality steel. It is strong and durable, making it an excellent choice for any construction project that requires wall formwork. The tie is designed to withstand an Ultimate Load of at least 50kN.

The Wall Formwork Tie serves as a Wall Formwork Ligation Member that ensures the formwork remains in place during the concrete pouring process. This is essential for the structural integrity of the building. The Wall Formwork Tie is easy to install and use, making it a popular choice among construction professionals.

The Surface Treatment of the Wall Formwork Tie is Galvanized, which provides excellent corrosion resistance. This means that the tie can be used in harsh environments without fear of rust or corrosion.

Technical Parameters:

Safe Working Load	≥10kN
Usage	Wall Bracket
Material	Steel
Ultimate Load	≥50kN
Length	Standard
Sample	Available For Free
Features	High Strength, Easy To Install, Reusable
Application	Concrete Wall Construction
Oem Service	Available
Surface Treatment	Galvanized

Applications:

The Wall Formwork Tie product has a safe working load of ≥10kN, which makes it a reliable product to use in any construction project. It is a concrete formwork accessory that is used to secure the wall template ligation. The product is essential in ensuring that the concrete formwork is secure during the construction process, and it helps to ensure that the wall is constructed accurately and precisely.

The Wall Formwork Tie product can be used in a variety of applications, including residential and commercial construction projects. It is an OEM service that is available for any customer who requires a customized product. The package of the product can be a carton box or as per customer's requirement.

The Wall Formwork Tie product is suitable for use in a variety of scenarios, including the construction of walls in residential and commercial buildings. It is an essential component of any concrete formwork accessory that is required to ensure that the walls are constructed accurately and precisely. The product is designed to meet the needs of any construction project, and it is a reliable and durable product that can withstand the pressures of any construction project.
