

Lightweight Silver Embedded Parts with Enhanced Corrosion Resistance for Custom Applications

Our Product Introduction

for more products please visit us on galvmetal.com

Basic Information

- Place of Origin: Hebei, China
- Certification: ISO9001
- Minimum Order Quantity: Negotiable
- Price: Negotiable
- Packaging Details: According to customer needs
- Delivery Time: 15-30 work days
- Payment Terms: TT

Product Specification

- Installation: Easy
- Customization: Available
- Weight: Lightweight
- Application: Building Construction
- Durability: High
- Color: Silver
- Corrosion Resistance: Strong
- Function: Embedded
- Highlight: **silver embedded parts,
lightweight embedded parts,
lightweight aluminum embedded components**

Product Description

Product Description:

Our Aluminum Embedded Parts are lightweight, making them easy to handle and install. The custom size options ensure that you can get the perfect fit for your project, no matter how big or small it may be.

One of the standout features of our Aluminum Embedded Parts is their strong corrosion resistance. We understand that building construction projects can face a variety of harsh conditions, which is why we use only high-quality materials that can withstand the test of time.

Our Galvanized embedded parts are made with precision and care, ensuring that each piece is crafted to the highest standard. This attention to detail ensures that you receive a product that is not only reliable but also aesthetically pleasing.

Whether you are building a new structure from the ground up or completing a renovation project, our Aluminum Embedded Parts are the perfect choice for your construction needs. With their strong corrosion resistance and lightweight design, these parts are sure to provide a solid foundation for any project.

Features:

This product, also known as Embedded Fixtures or Galvanized embedded parts, is perfect for use in building construction due to its strong corrosion resistance and good heat resistance. The surface treatment of anodizing provides additional durability to the already sturdy aluminum material.

Technical Parameters:

Material:	Aluminum
Size:	Customized
Heat Resistance:	Good
Color:	Silver
Installation:	Easy
Customization:	Available
Corrosion Resistance:	Strong
Application:	Building Construction
Shape:	Customized
Surface Treatment:	Anodizing

Applications:

Galvanized embedded parts are also widely used in the construction industry. These parts are made from high-quality aluminum and are coated with a layer of zinc to provide protection against corrosion. They are commonly used in concrete structures to provide support and stability. The lightweight nature of the aluminum material makes them easy to install, even in hard to reach places.

Embedded fixtures are another common application for Aluminum Embedded Parts. These fixtures are used in various industries, including automotive, aerospace, and electronics. The lightweight nature of the aluminum material makes them ideal for use in these industries. The anodized surface treatment provides protection against corrosion, which is important for fixtures that are exposed to the elements.

Aluminum Embedded Parts are produced in Hebei, China, and are certified with ISO9001. The minimum order quantity and price are negotiable, and the packaging details can be customized according to customer needs. The delivery time is 15-30 work days, and payment terms are TT. Installation is easy, and the shape can be customized to meet specific requirements. The lightweight nature of the aluminum material makes them easy to handle during installation, even in hard to reach places.

Packing and Shipping:

Product Packaging:

The aluminum embedded parts are packed in a sturdy cardboard box to ensure safe delivery

Each part is individually wrapped in bubble wrap to prevent damage during transportation

The box is sealed with strong adhesive tape to prevent any accidental opening

Shipping:

Shipping is available worldwide
The product will be shipped within 24-48 hours of order placement
Delivery time will depend on the destination country and shipping method chosen
Customers will receive a tracking number to monitor the status of their shipment

FAQ:

Q: What is the place of origin of the Aluminum Embedded Parts?

A: The Aluminum Embedded Parts are manufactured in Hebei, China.

Q: Does the Aluminum Embedded Parts have any certifications?

A: Yes, the Aluminum Embedded Parts have ISO9001 certification.

Q: What is the minimum order quantity for the Aluminum Embedded Parts?

A: The minimum order quantity for the Aluminum Embedded Parts is negotiable.

Q: Is the price of the Aluminum Embedded Parts negotiable?

A: Yes, the price of the Aluminum Embedded Parts is negotiable.

Q: How are the Aluminum Embedded Parts packaged and delivered?

A: The Aluminum Embedded Parts are packaged according to customer needs and are delivered within 15-30 work days. Payment terms are TT.
