Product Description

Product Description:

Our Cable Raceway Tray is made of high-quality materials, making it long-lasting and durable for your cable support needs. The integrated channel type design of this product is perfect for organizing and supporting your cables while keeping them safe from damage. With a length of 2-3m, our Cable Raceway Tray provides ample space for your cables to be organized and secured.

Our Cable Raceway Tray features excellent fire resistance, making it perfect for industrial and commercial settings. With its good fire resistance, you can be assured that your cables are safe from fire hazards. This product is perfect for use in data centers, manufacturing plants, and other industrial settings.

Our Cable Raceway Tray is also known as a Cable Support Channel. This product is designed to support and organize your cables, making it easier for you to access and maintain them. It is perfect for use in areas where cables need to be organized and supported, such as offices, homes, and industrial settings.

Features:

Our Cable Tray product, also known as Cable Raceway Tray or Cable Support Channel, is manufactured and exported with a thickness of 2.0mm. It has good fire resistance and is long-lasting, with a length of 2-3m.

Fire Resistance	Good

Applications:

The Cable Tray is made of high-quality Steel material, ensuring that it is durable and long-lasting. It comes with a standard Length of 2-3 meters and a Width of 400mm. However, customization options are available for customers who require a different size or shape to fit their specific needs. Additionally, OEM services are available for those who require a customized product with their own branding.

The Cable Tray is an Integrated Channel Type product that can be used in a wide range of applications. It is particularly useful in industrial and commercial settings where there is a high volume of cables that need to be organized and managed. Some common Product Application Occasions and Scenarios for the Cable Tray include:

- Manufacturing plants
- Data centers
- Hospitals
- Schools and universities
- Shopping malls
- Airports
- Office buildings

Packing and Shipping:

Product Packaging:

The cable tray will be carefully packed in a sturdy cardboard box to ensure it arrives in perfect condition.

The box will be labeled with the product name, dimensions, and weight for easy identification.

Inside the box, the cable tray will be wrapped in protective material to prevent any scratches or damage during transport.

Shipping:

The cable tray will be shipped via a reputable courier service to ensure timely and secure delivery.

Shipping costs will be calculated based on the destination and weight of the package.
Customers will receive a tracking number once the item has been shipped so they can monitor its progress.
