# Building Materials Galvanised Steel Round Bar For High Temperature And Low Temperature

# **Basic Information**

- Place of Origin:
- Certification: ISO9001
- Minimum Order
  Quantity:
- Price: Negotiable
- Packaging Details: According to customer needs

TT

- Delivery Time: 15-30 work days
- Payment Terms:

# **Product Specification**

• Type:	Carbon Steel Bar
Material:	Q235
Surface Finish:	Bright Surface
Application:	Building Materials, Building
Surface Treatment:	Galvanized
Diameter:	Customization
Packing:	In Bundles, Waterproof Plastic Bag, Woven Bag, Etc.
Highlight:	building round steel bar, building galvanised steel round bar,

q235 round steel bar

**Our Product Introduction** 

## **Product Description:**

The Galvanized Circular Steel is coated with Zinc, which provides a corrosion-resistant surface and makes it ideal for outdoor use. The Zinc Coating ranges from 200g/m2 to 600g/m2, adding an extra layer of protection to the steel bar. This round steel bar is perfect for constructional projects due to its shape and surface treatment. The round shape allows for easy bending and shaping, making it perfect for various constructional purposes. Its surface treatment with galvanization adds an extra layer of resistance to corrosion and rust, ensuring durability and longevity.

The Galvanized Circular Steel is available in various packaging options, making it easy to transport and store. It is packaged in bundles, waterproof plastic bags, woven bags, and other packaging materials to ensure its safety during transportation and storage. Our Galvanized Circular Steel is suitable for various constructional projects, including building frames, fences, and other outdoor structures. Its strength and durability make it a reliable and long-lasting material for any constructional project.

#### **Technical Parameters:**

Shape:	Round
Туре:	Carbon Steel Bar
Material:	Q235 Steel
Material Characteristics:	Corrosion Resistance, High Temperature And Low Temperature
Technique:	Hot Rolled
Steel Grade:	Hot Dip Galvanizing
Application:	Building Materials, Building
Length:	Customization
Surface Treatment:	Galvanized

### **Applications:**

This Low Hot Rolled Round Bar is perfect for building and constructional projects. It is available in steel grade Hot Dip Galvanizing with a zinc coating of 200g/m2 - 600g/m2. The specifications of our Galvanized Circular Steel range from 8mm to 360mm. Our Stainless Steel Bar for Constructional purposes is a high-quality product that is built to last.

Our Galvanized Round Steel Bar is ideal for various building materials and applications. It is a popular choice for construction projects, as it is durable and reliable. The product is suitable for use in the construction of buildings, bridges, highways, and other structures. It is also used in the manufacturing of machinery and equipment.

#### **Packing and Shipping:**

Product Packaging:

The Galvanized Round Steel Bar will be packaged securely in bundles with steel straps to ensure safe transportation. Each bundle will be clearly labeled with product specifications and quantity. Shipping:

The Galvanized Round Steel Bar will be shipped via a reliable carrier that has experience transporting steel products. Shipping times may vary depending on the destination, but we will provide tracking information so you can monitor the progress of your shipment.

### FAQ:

- Q: What is the place of origin of Galvanized Round Steel Bar?
- A: The Galvanized Round Steel Bar is manufactured in Hebei, China.
- Q: Does the Galvanized Round Steel Bar have any certification?
- A: Yes, it has ISO9001 certification.
- Q: What is the minimum order quantity for Galvanized Round Steel Bar?
- A: The minimum order quantity for Galvanized Round Steel Bar is negotiable.
- Q: What is the price of Galvanized Round Steel Bar?
- A: The price of Galvanized Round Steel Bar is negotiable.
- Q: How is Galvanized Round Steel Bar packaged and delivered?
- A: The packaging of Galvanized Round Steel Bar is according to customer needs. Delivery time is 15-30 work days. Payment terms are TT.
