

## Hot Dipped Galvanised Steel Angles Sizes For Machinery Shipment Container And Other Custom Steel Fabrication

### Our Product Introduction

for more products please visit us on [galvmetal.com](http://galvmetal.com)

#### Basic Information

- Place of Origin: Hebei, China
- Certification: ISO9001
- Minimum Order Quantity: Negotiable
- Price: Negotiable
- Packaging Details: According to customer needs
- Delivery Time: 15-30 work days
- Payment Terms: TT

#### Product Specification

- Surface Treatment: Galvanized
- Material: Carbon Steel
- Technology: Hot Dipped
- Quality: High Quality. Inspection
- Production Capacity: 5000 Tons Per Month
- Shape: L Shape
- Processing Services: Welding And Cutting
- Application: Construction, Machinery, Shipbuilding, Etc.
- Highlight: **shipment container galvanised mild steel angle, shipment container galvanised steel angles sizes, cutting galvanised mild steel angle**

## Product Description

### Product Description:

The Galvanized Angle Steel is designed with an L shape, which makes it easy to install and perfect for use in various construction projects. It features a wide edge width of 140mm, which can be customized according to your specific requirements. This allows you to get the perfect fit for your construction project, ensuring that your structure is sturdy and secure.

The Galvanized Angle Steel is made using a hot-rolled galvanized steel process, which involves heating the steel to high temperatures and rolling it into the desired shape. This process strengthens the steel and makes it more resistant to corrosion and rust, ensuring that your construction project will stand the test of time.

This product is ideal for use in a wide range of construction applications, including building frames, brackets, support structures, and much more. Its versatility and durability make it a popular choice for both commercial and residential construction projects.

When you choose our Galvanized Angle Steel, you can rest assured that you are getting a high-quality product that will meet your construction needs. Our team of experts is committed to providing you with the best products and services, ensuring that you get the perfect fit for your construction project.

### Features:

Galvanized angle steel is known for its excellent anti-corrosion performance, which is achieved through a hot-dip coating process that uniformly covers the surface of the steel with a dense metal protective layer. This layer effectively isolates the angle steel from direct contact with oxygen and moisture in the air, significantly improving its corrosion resistance and rust resistance. It can maintain long-term stable performance even in harsh environments like humidity, acidity, and alkalinity.

In addition to its anti-corrosion benefits, galvanizing treatment also enhances the structural strength of angle steel. The metallurgical bond between the galvanized layer and the base metal makes the angle steel more stable and reliable, making it suitable for various structural systems requiring high-strength support.

Galvanized angle steel has a uniform color and smooth, bright surface that enhances the overall beauty of buildings. Its excellent anti-corrosion performance reduces maintenance workload and costs, only requiring regular cleaning to maintain its appearance and performance.

Galvanized angle steel is widely used in various industries, including construction, bridges, power, communication, transportation, and manufacturing. Its good processing performance and weldability make it convenient to process and manufacture.

### Technical Parameters:

Material	Q235
Name	Galvanized Angle Steel
Shipment	Container Or As Your Request
Length	4380mm, Customized
Technology	Hot Dipped
Surface Treatment	Galvanized
Surface	Mild Steel Plain
Edge Width	140mm, Customized
Processing Services	Welding And Cutting
Quality	High Quality. Inspection

### Applications:

Galvanized Angle Steel is commonly used in construction and engineering industries due to its durability and strength. It is perfect for structural support, such as in the construction of buildings, bridges, and towers. The L shape of the steel provides additional stability and support, making it ideal for heavy-duty applications.

Another common application for Galvanized Angle Steel is in the manufacturing industry. It is frequently used in the production of machinery, equipment, and vehicles. Its high-quality and inspection ensures that it can withstand the wear and tear of daily use.

In addition to construction and manufacturing, Galvanized Angle Steel is also used in the agricultural industry. It is perfect for creating fences, gates, and other structures that require strength and durability. Its ability to withstand harsh weather conditions makes it ideal for outdoor use.

Galvanized Angle Steel is available in a variety of lengths, with 4380mm being a standard size. However, customized lengths can also be produced according to customer needs. The steel can be either hot rolled or cold rolled, depending on the application. The production capacity is 5000 tons per month, ensuring that customers can receive their orders in a timely manner.

### Packing and Shipping:

#### Product Packaging:

This Galvanized Angle Steel product is packaged securely to ensure it arrives in excellent condition. Each bundle is wrapped tightly with steel straps and covered with a protective layer to prevent any scratches or damage during shipping. The bundles are then placed on a pallet and shrink-wrapped to provide additional protection during transit.

#### Shipping:

Our shipping process is designed to ensure timely and secure delivery of your Galvanized Angle Steel order. We work with reputable carriers to transport your order from our warehouse to your designated delivery location. Shipping costs will be calculated based on the weight and dimensions of your order and your delivery location.

---

### FAQ:

#### What is Galvanized Angle Steel?

Galvanized Angle Steel is a type of steel that has been coated with a layer of zinc to protect it from corrosion and rust.

#### Where is Galvanized Angle Steel made?

Galvanized Angle Steel is made in Hebei, China.

#### Is Galvanized Angle Steel certified?

Yes, Galvanized Angle Steel is certified with ISO9001.

#### What is the minimum order quantity for Galvanized Angle Steel?

The minimum order quantity for Galvanized Angle Steel is negotiable.

#### What are the payment terms for Galvanized Angle Steel?

The payment terms for Galvanized Angle Steel are TT (telegraphic transfer).

#### What is the price of Galvanized Angle Steel?

The price of Galvanized Angle Steel is negotiable and dependent on factors such as quantity, size, and delivery location.

#### What are the packaging details for Galvanized Angle Steel?

The packaging details for Galvanized Angle Steel are according to customer needs.

#### What is the delivery time for Galvanized Angle Steel?

The delivery time for Galvanized Angle Steel is typically 15-30 work days, depending on the quantity and delivery location.
