

Customized Galvanized Heavy Angle Bar Angle Steel For Shipment Container

Our Product Introduction

for more products please visit us on galvmetal.com

Basic Information

- Place of Origin: Hebei, China
- Certification: ISO9001
- Minimum Order Quantity: Negotiable
- Price: Negotiable
- Packaging Details: According to customer needs
- Delivery Time: 15-30 work days
- Payment Terms: TT

Product Specification

- Quality: High Quality. Inspection
- Edge Width: 140mm, Customized
- Technology: Hot Rolled Or Cold Rolled
- Length: 4380mm, Customized
- Application: Construction, Machinery, Shipbuilding, Etc.
- Surface: Mild Steel Plain
- Surface Treatment: Galvanized
- Material: Carbon Steel
- Highlight: **customized galvanized heavy angle ,
customized galvanized metal angle ,
shipment container galvanized heavy angle**

Product Description

Product Description:

Our galvanized angle steel is made using either Hot Rolled or Cold Rolled technology, ensuring maximum durability and strength. The Low carbon equal angle steel is finished with a layer of galvanized coating, which provides excellent corrosion resistance, making it perfect for use in high-moisture environments. Additionally, the galvanized coating adds a sleek and modern look to your construction projects.

We take quality seriously, which is why we subject our galvanized angle steel to rigorous inspection and testing to ensure that it meets the highest standards of quality. You can rest assured that our products are of the highest quality, and will stand the test of time.

We offer flexible shipment options for your convenience. Our galvanized angle steel can be shipped in containers or as per your request.

We understand that every construction project is unique, and we strive to provide customized solutions that meet your individual needs.

So why wait? Contact us today to place your order for Hot-rolled galvanized steel and take the first step towards building a strong and durable construction project.

Features:

1. Excellent anti-corrosion performance:

The hot-dip coating process applied to the surface of angle steel ensures the uniform coverage of a dense metal protective layer. This layer effectively isolates the angle steel from the air's oxygen and moisture, providing improved corrosion and rust resistance. Even in harsh environments such as humidity, acidity, and alkalinity, the angle steel maintains long-term stable performance. Overall, this process can greatly extend the angle steel's service life.

2. Enhance structural strength:

Besides improving anti-corrosion performance, galvanizing treatment enhances the overall mechanical strength of angle steel through the combination of galvanized layers. The metallurgical bond between the galvanized layer and the base metal provides more stability when exposed to external forces like pressure and tension, making it ideal for various high-strength structural systems.

3. Beautiful and easy to maintain:

Galvanized angle steel has a smooth and bright surface with a uniform color and good decorative effect that can enhance the overall beauty of buildings. Due to its excellent anti-corrosion performance, this material reduces the workload and cost of later maintenance, only requiring regular cleaning to maintain its good appearance and performance.

4. Wide applicability:

This material can be used as structural components, supports, and connectors in various fields such as construction, bridges, power, communication, transportation, and manufacturing. Its excellent processing performance and weldability make galvanized angle steel more flexible and convenient in the processing and manufacturing process.

Technical Parameters:

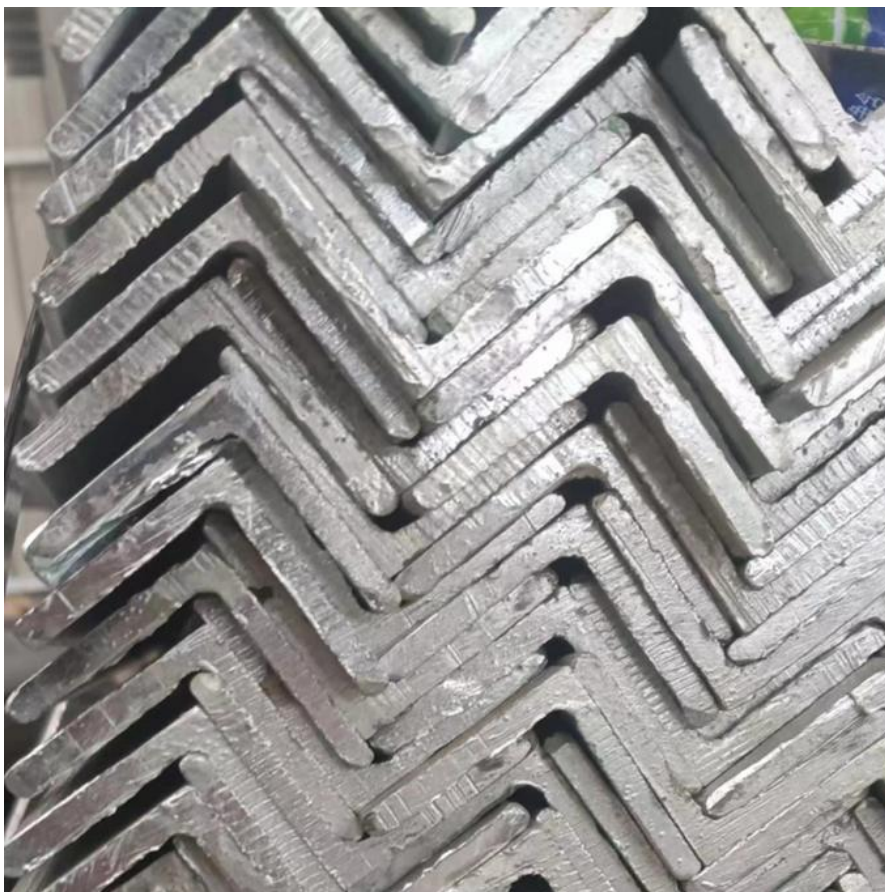

Product Name	Galvanized Angle Steel
Material	Carbon Steel
Shape	L Shape
Edge Width	140mm, Customized
Length	4380mm, Customized
Surface Treatment	Galvanized
Processing Services	Welding And Cutting
Technology	Hot Rolled Or Cold Rolled
Production Capacity	5000 Tons Per Month
Shipment	Container Or As Your Request

Applications:

The L-shaped design of the Galvanized Angle Steel makes it ideal for applications that require structural support, such as beams, frames, and brackets. The product's durability and corrosion resistance make it perfect for outdoor applications, such as fencing, handrails, and solar panel support structures.

Slotted cold drawn angle steel is a variant of Galvanized Angle Steel that has slots cut into it. These slots make it easier to bolt the product to other structures and increase its versatility. The product is commonly used in electrical installations, furniture manufacturing, and display shelves.

Hot-rolled galvanized steel is another variant of Galvanized Angle Steel that is ideal for applications that require high strength and rigidity. The product is commonly used in vehicle manufacturing, shipbuilding, and machinery manufacturing.

Packing and Shipping:

Product Packaging:

The Galvanized Angle Steel product will be packaged in a sturdy cardboard box to ensure its safety during transportation. The angles will be securely wrapped in plastic to prevent any scratches or damages during shipping.

Shipping:

We offer free shipping for orders of Galvanized Angle Steel product within the United States. Our shipping partners will ensure that the product is delivered to your doorstep in a timely and secure manner. Please allow 3-5 business days for delivery.

FAQ:

Q: What is Galvanized Angle Steel?

A: Galvanized Angle Steel is a type of steel product that has been coated with a layer of zinc to protect it from corrosion. It is commonly used in construction and industrial applications.

Q: Where is Galvanized Angle Steel made?

A: Our Galvanized Angle Steel is made in Hebei, China.

Q: Is your Galvanized Angle Steel certified?

A: Yes, our Galvanized Angle Steel is certified with ISO9001 quality management system.

Q: What is the minimum order quantity for Galvanized Angle Steel?

A: The minimum order quantity for Galvanized Angle Steel is negotiable depending on the specific product and order requirements.

Q: How much does Galvanized Angle Steel cost?

A: The price of our Galvanized Angle Steel is negotiable and depends on the specific product and order quantity.

Q: What are the packaging details for Galvanized Angle Steel?

A: The packaging details for our Galvanized Angle Steel can be customized according to customer needs.

Q: What is the delivery time for Galvanized Angle Steel?

A: Our standard delivery time for Galvanized Angle Steel is 15-30 work days.

Q: What are the payment terms for Galvanized Angle Steel?

A: Our payment terms for Galvanized Angle Steel are TT (Telegraphic Transfer) or negotiable depending on the specific order requirements.
