

# 5000 Ton Monthly Capacity Hot Dipped Galvanized Angle Iron Beams L Shaped Iron Steel Cold / Hot Rolled

## **Basic Information**

Quantity:

Place of Origin: Hebei, China
Certification: ISO9001
Minimum Order Negotiable

Price: Negotiable

Packaging Details: According to customer needs

• Delivery Time: 15-30 work days

Payment Terms: TT

## **Product Specification**

Material: Carbon SteelShape: L ShapeTechnology: Hot Dipped

Processing Services: Welding And Cutting
Edge Width: 140mm, Customized

• Surface Treatment: Galvanized

• Length: 4380mm, Customized

Highlight: hot rolled galvanized steel angle iron,

hot rolled hot dipped galvanized angle iron  $\!,$ 

140mm galvanized steel angle iron

## **Product Description:**

With a length of 4380mm, our Galvanized Angle Steel can be customized to meet your specific requirements. Its edge width of 140mm can also be customized to suit your needs, making it a versatile and adaptable option for any construction project.

Our Galvanized Angle Steel is created using the hot dipped technology, which ensures a strong and reliable product. It is then treated with a galvanized surface treatment, providing an extra layer of protection against corrosion and rust.

At our company, we place a high emphasis on quality and inspection. Our Galvanized Angle Steel is no exception, and we guarantee that it is of the highest quality. It has undergone rigorous inspections to ensure its reliability and durability, giving you peace of mind when using it in your construction projects.

#### Features:

Galvanizing is a hot-dip coating process which uniformly covers the surface of angle steel with a galvanized layer. This process forms a dense metal protective layer, which isolates the angle steel from direct contact with oxygen and moisture in the air. Galvanized angle steel exhibits excellent anti-corrosion performance and rust resistance, even in harsh environments such as humidity, acidity, and alkalinity. The galvanizing treatment not only improves its anti-corrosion performance but also enhances the overall mechanical strength of the angle steel. The combination of galvanized layers makes the angle steel more stable and reliable when subjected to external forces such as pressure and tension. Galvanized angle steel is then suitable for different structural systems requiring high-strength support. Not only that, galvanized angle steel has a smooth and bright surface, uniform color, and good decorative effect. Regular cleaning is the only maintenance required to maintain its good appearance and performance reducing workload and maintenance costs. This type of steel is widely used for structural components, supports, connectors, etc. in various fields such as construction, bridges, power, communication, transportation, and manufacturing. Good processing performance and weldability also make it more flexible and convenient in processing and manufacturing processes.

Galvanized angle steel is produced according to environmental standards, and the galvanized layer material can be recycled and reused, reducing environmental pollution. It reduces material waste and frequency of replacement indirectly reducing energy consumption and carbon emissions to support the concept of sustainable development.

#### **Technical Parameters:**

-	
Product Name	Coated L-Shaped Iron
Material	Low carbon equal angle steel, Hot-rolled galvanized steel
Surface Treatment	Galvanized, Mild Steel Plain
Material Grade	Q235
Shape	L Shape
Length	4380mm, Customized
Application	Construction, Machinery, Shipbuilding, Etc.
Production Capacity	5000 Tons Per Month
Quality	High Quality. Inspection
Shipment	Container Or As Your Request

## **Applications:**

Product Application Occasions and Scenarios

Galvanized Angle Steel is a type of L-shaped steel that is hot-dipped to provide a protective layer against corrosion. It is a high-quality product that is inspected to ensure that it meets the required standards. The product can be used in the following occasions and scenarios:

Construction:

Galvanized Angle Steel is commonly used in the construction industry to provide structural support for buildings and bridges. The product is strong and durable, making it suitable for use in a variety of construction projects. It can be used to support beams, columns, and other structures that require additional support.

Manufacturing:

Galvanized Angle Steel is also used in the manufacturing industry to produce a variety of products. The product can be used to make shelves, brackets, frames, and other products that require a strong and durable material. It is often used in the production of machinery and equipment due to its strength and durability.

Engineering

Galvanized Angle Steel is used in the engineering industry to provide support for pipelines and other structures. The product can be used to provide support for bridges and other structures that require additional support. It is also used in the construction of power plants, dams, and other large-scale engineering projects.

## **Packing and Shipping:**

Product Packaging:

The Galvanized Angle Steel product will be securely packed in cartons or wooden cases to prevent any damage during transportation. Each bundle will be properly labeled for easy identification.

Product Shipping:

The Galvanized Angle Steel product will be shipped from our warehouse within 1-3 business days after the order has been placed. We offer various shipping options to deliver the product to your desired location. Shipping fees may vary depending on the distance and shipping method selected.

#### FAQ:

#### Frequently Asked Questions:

#### Q: What is Galvanized Angle Steel?

A: Galvanized Angle Steel is a type of steel that has undergone a galvanization process. This process involves coating the steel with a layer of zinc to protect it from corrosion and rust.

#### Q: Where is this product manufactured?

A: This product is manufactured in Hebei, China.

#### Q: Is this product certified?

A: Yes, this product is certified with ISO9001.

## Q: What is the minimum order quantity for this product?

A: The minimum order quantity for this product is negotiable.

#### Q: What is the price of this product?

A: The price of this product is negotiable.

### Q: How is this product packaged?

A: This product is packaged according to customer needs.

#### Q: What is the delivery time for this product?

A: The delivery time for this product is 15-30 work days.

#### Q: What are the payment terms for this product?

A: The payment terms for this product are TT.
