

Inspection Galvanized Metal Angle For Mild Steel Plain Surface 4380mm Length 140mm Edge

Our Product Introduction

for more products please visit us on galvmetal.com

Basic Information

- Place of Origin: Hebei, China
- Certification: ISO9001
- Minimum Order Quantity: Negotiable
- Price: Negotiable
- Packaging Details: According to customer needs
- Delivery Time: 15-30 work days
- Payment Terms: TT

Product Specification

- Quality: High Quality. Inspection
- Application: Construction, Machinery, Shipbuilding, Etc.
- Surface: Mild Steel Plain
- Production Capacity: 5000 Tons Per Month
- Length: 4380mm, Customized
- Name: Angle Steel
- Edge Width: 140mm, Customized
- Technology: Hot Rolled Or Cold Rolled
- Highlight: **4380mm galvanized heavy angle ,
4380mm galvanized metal angle ,
140mm galvanized heavy angle**

Product Description

Product Description:

One of the unique features of this Galvanized Angle Steel is its slotted cold drawn design, which allows for easy welding and cutting. This makes it an ideal choice for those who need to customize the angle steel to fit their specific needs. With an edge width of 140mm, this Galvanized Angle Steel can be customized to fit a wide range of applications.

In addition to its versatility and durability, the Galvanized Angle Steel is also known for its corrosion resistance. This is due to the galvanization process that the steel undergoes, which coats the steel with a layer of zinc. This layer of zinc acts as a protective barrier against rust and corrosion, ensuring that the angle steel lasts for years without needing to be replaced.

One of the key benefits of the Galvanized Angle Steel is its processing services. This angle steel can be easily welded and cut to fit specific applications. This makes it an ideal choice for those who need to customize the angle steel to fit their specific needs. With its slotted cold drawn design and low carbon equal angle steel, this Galvanized Angle Steel can be easily worked with using standard welding and cutting tools.

Features:

Excellent anti-corrosion performance:

The galvanized layer is uniformly covered on the surface of the angle steel through hot-dip coating process, forming a dense metal protective layer that effectively isolates the angle steel from direct contact with oxygen and moisture in the air, thereby greatly improving the corrosion resistance and rust resistance of the angle steel. Even in harsh environments such as humidity, acidity, and alkalinity, it can maintain long-term stable performance and extend its service life.

Enhance structural strength:

Galvanizing treatment not only improves the anti-corrosion performance of angle steel, but also enhances the overall mechanical strength of angle steel through the combination of galvanized layers. The metallurgical bond between the galvanized layer and the base metal makes the angle steel more stable and reliable when subjected to external forces such as pressure and tension, making it suitable for various structural systems that require high-strength support.

Beautiful and easy to maintain:

Galvanized angle steel has a smooth and bright surface, uniform color, and good decorative effect, which can enhance the overall beauty of buildings. Meanwhile, due to its excellent anti-corrosion performance, it reduces the workload and cost of later maintenance, and only requires regular cleaning to maintain its good appearance and performance.

Wide applicability:

Galvanized angle steel is widely used in construction, bridges, power, communication, transportation, manufacturing and other fields as structural components, supports, connectors, etc., to meet the needs of different industries for material performance, size, shape and other aspects. Its good processing performance and weldability also make galvanized angle steel more flexible and convenient in the processing and manufacturing process.

Environmental protection and energy conservation:

The production process of galvanized angle steel meets environmental standards, and the galvanized layer material can be recycled and reused, reducing environmental pollution. Meanwhile, due to its excellent anti-corrosion performance, it reduces material waste and replacement frequency caused by corrosion, indirectly reducing energy consumption and carbon emissions, in line with the concept of sustainable development.

Technical Parameters:

Product Name:	Galvanized Angle Steel
Material:	Q235
Shape:	L Shape
Surface:	Mild Steel Plain
Technology:	Hot Dipped
Edge Width:	140mm, Customized
Processing Services:	Welding and Cutting
Application:	Construction, Machinery, Shipbuilding, etc.
Technology:	Hot Rolled or Cold Rolled
Shipment:	Container or as your request

Applications:

The Surface of the Galvanized Angle Steel is Mild Steel Plain, and it is made of Q235 material. The standard length of this product is 4380mm, but it can be customized to meet the needs of different applications. The production capacity of the Galvanized Angle Steel is 5000 Tons Per Month, ensuring that there is always enough supply for customers.

The Galvanized Angle Steel can be used in a variety of application occasions and scenarios. In the construction industry, it is commonly used to support structures and provide reinforcement. It is also used in the machinery industry as a component for manufacturing equipment. In the shipbuilding industry, it is used to support the hull and provide structural integrity.

Overall, the Galvanized Angle Steel is a reliable and durable product that can meet the needs of various industries. Its versatility and quality make it a popular choice for customers worldwide.

Packing and Shipping:

Product Packaging:

Galvanized Angle Steel will be packed in bundles with steel strips.
The bundles will be securely tied with steel wires to prevent any damage during transportation.
The bundles will be labeled with product information including product name, dimensions, quantity, and weight.
Shipping:
The Galvanized Angle Steel will be shipped via truck or ship depending on the order size and delivery location.
The shipping method will be chosen to ensure timely and cost-effective delivery.
The delivery address will be confirmed prior to shipping to avoid any delivery delays or issues.

FAQ:

Here are 5 frequently asked questions and answers for the Galvanized Angle Steel product:

Q: What is the place of origin for the Galvanized Angle Steel product?

A: The Galvanized Angle Steel product is made in Hebei, China.

Q: Is the Galvanized Angle Steel product certified?

A: Yes, the Galvanized Angle Steel product is certified with ISO9001.

Q: What is the minimum order quantity for the Galvanized Angle Steel product?

A: The minimum order quantity for the Galvanized Angle Steel product is negotiable.

Q: How much does the Galvanized Angle Steel product cost?

A: The price for the Galvanized Angle Steel product is negotiable.

Q: How is the Galvanized Angle Steel product packaged and delivered?

A: The packaging details for the Galvanized Angle Steel product are according to customer needs. The delivery time is 15-30 work days.
Payment terms are TT.
