

Q235 Hot Rolled Angle Steel 4380mm For Construction Machinery

Our Product Introduction

for more products please visit us on galvmetal.com

Basic Information

- Place of Origin: Hebei, China
- Certification: ISO9001
- Minimum Order Quantity: Negotiable
- Price: Negotiable
- Packaging Details: According to customer needs
- Delivery Time: 15-30 work days
- Payment Terms: TT

Product Specification

- Length: 4380mm, Customized
- Application: Construction, Machinery, Shipbuilding, Etc.
- Surface: Mild Steel Plain
- Technology: Hot Rolled Or Cold Rolled
- Shipment: Container Or As Your Request
- Processing Services: Welding And Cutting
- Name: Angle Steel
- Edge Width: 140mm, Customized
- Highlight: **q235 hot rolled angle steel,**
hot rolled angle steel 4380mm,
q235 hot rolled steel angle

Product Description

Product Description:

At our company, we offer high-quality Galvanized Angle Steel that has undergone a thorough inspection process to ensure its quality. We understand the importance of using reliable and sturdy materials for construction projects, which is why we make sure that our Galvanized Angle Steel meets the highest standards.

Our Galvanized Angle Steel comes in a length of 4380mm, but we also offer customized lengths to fit your specific project needs. The edge width of our Galvanized Angle Steel is 140mm, but again, we can customize the width to meet your requirements.

When it comes to shipment, we can deliver your Galvanized Angle Steel in a container or as per your request. We understand that timely delivery is crucial for construction projects, which is why we work closely with our clients to ensure that their orders are delivered on time and in good condition.

Features:

Galvanized Angle Steel

Galvanized angle steel is a popular choice in the construction industry due to its excellent performance and durability. Its surface is coated with a uniform layer of galvanized material through a hot-dip coating process, forming a dense metal protective layer that isolates the angle steel from the elements in the air.

Excellent Anti-Corrosion Performance

The galvanized layer on the surface of the angle steel provides effective protection against corrosion and rust, even in harsh environments such as humidity, acidity, and alkalinity. It extends the service life of the angle steel and ensures its long-term stable performance.

Enhanced Structural Strength

Galvanizing treatment not only improves the anti-corrosion performance of angle steel, but also enhances its overall mechanical strength. The metallurgical bond between the galvanized layer and the base metal makes the angle steel more stable and reliable when subjected to external forces such as pressure and tension, making it suitable for high-strength support in various structural systems.

Beautiful and Easy to Maintain

The smooth and bright surface of galvanized angle steel offers a good decorative effect, enhancing the beauty of buildings. Its excellent anti-corrosion performance reduces the workload and cost of later maintenance, and regular cleaning is all that is needed to maintain its good appearance and performance.

Wide Applicability

Galvanized angle steel is widely used in construction, bridges, power, communication, transportation, manufacturing, and other fields as structural components, supports, connectors, and more. Its good processing performance and weldability make it more flexible and convenient for processing and manufacturing.

Technical Parameters:

Surface	Mild Steel Plain
Quality	High Quality. Inspection
Length	4380mm, Customized
Surface Treatment	Galvanized
Material	Q235
Name	Angle Steel
Shape	L Shape
Production Capacity	5000 Tons Per Month
Technology	Hot Dipped
Edge Width	140mm, Customized

Applications:

The Galvanized Angle Steel product is manufactured in Hebei, China, under strict quality control measures and is certified under ISO9001 standards, ensuring that customers receive only the highest quality product. With a minimum order quantity that is negotiable, this product is available at a price that is also negotiable, making it accessible to a wide range of customers.

The Galvanized Angle Steel product is available in a wide range of edge widths, including a customizable option of 140mm. This flexibility in sizing allows for a wide range of applications, making it ideal for use in construction, manufacturing, and other industries. The product is available in both Hot Rolled and Cold Rolled technologies, depending on the specific needs of the customer.

One of the key features of Galvanized Angle Steel is its versatility in application. It is commonly used in the construction industry for framing, roof trusses, and support beams, as well as in manufacturing for the fabrication of machinery, equipment, and parts. Its durability and resistance to corrosion make it ideal for use in outdoor applications, such as fencing, gates, and railings. The product is also popular in the automotive industry for its ability to withstand impacts and resist wear and tear over time.

Packing and Shipping:

Product Packaging:

The Galvanized Angle Steel product will be packaged in sturdy wooden crates to ensure safe transportation and delivery.

Shipping:

Our standard shipping method is by sea, but we also offer air freight for urgent orders. We work with reliable and experienced shipping companies to ensure timely delivery of your order to your designated location. Shipping costs will depend on the quantity of your order and the destination address.

FAQ:

Q1. What is Galvanized Angle Steel?

A1. Galvanized Angle Steel, also known as angle iron, is a steel product that has been galvanized to resist corrosion.

Q2. Where is Galvanized Angle Steel made?

A2. Our Galvanized Angle Steel is made in Hebei, China.

Q3. What certifications does your Galvanized Angle Steel have?

A3. Our Galvanized Angle Steel has been certified with ISO9001.

Q4. What is the minimum order quantity for Galvanized Angle Steel?

A4. The minimum order quantity for our Galvanized Angle Steel is negotiable.

Q5. What are the payment terms for purchasing Galvanized Angle Steel?

A5. The payment terms for purchasing our Galvanized Angle Steel is TT.
