

L Shape Galvanized Angle Steel With Smooth Surface Galvanized L Angle Hot Rolled Or Cold Rolled

Our Product Introduction

for more products please visit us on galvmetal.com

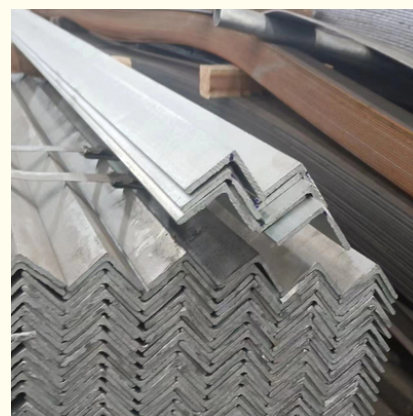

Basic Information

- Place of Origin: Hebei, China
- Certification: ISO9001
- Minimum Order Quantity: Negotiable
- Price: Negotiable
- Packaging Details: According to customer needs
- Delivery Time: 15-30 work days
- Payment Terms: TT

Product Specification

- Technology: Hot Rolled Or Cold Rolled
- Quality: High Quality. Inspection
- Surface: Mild Steel Plain
- Edge Width: 140mm, Customized
- Material: Q235
- Surface Treatment: Galvanized
- Shape: L Shape
- Highlight: **I shape galvanized angle steel, smooth surface galvanized I angle, galvanized I angle hot rolled**

Product Description

Product Description:

Our galvanized angle steel is made from high-quality Q235 carbon steel, ensuring excellent durability and strength. It is available in both hot rolled and cold rolled options, giving you the flexibility to choose the best option for your specific application.

The galvanized surface treatment on our L-angle steel provides excellent corrosion resistance, making it ideal for use in harsh environments or applications where exposure to moisture or other corrosive elements is a concern. This coating also enhances the aesthetic appeal of the steel, making it a popular choice for architectural and decorative applications.

Our galvanized L-angle steel product is available in a range of sizes and thicknesses, allowing you to find the perfect fit for your needs. Whether you're looking for a small piece of angle steel for a DIY project or need a large quantity for a commercial application, we have you covered.

So why choose our galvanized angle steel product? In addition to its high quality and excellent corrosion resistance, it is also easy to work with and can be easily welded, drilled, or cut to meet your specific needs. Plus, our competitive pricing and fast, reliable shipping make it easy to get the steel you need quickly and at a price you can afford.

Features:

Galvanized angle steel has many advantages, including excellent anti-corrosion performance. This is achieved through a hot-dip coating process that forms a dense metal protective layer over the surface of the angle steel. This layer effectively isolates the angle steel from direct contact with oxygen and moisture in the air, greatly improving its corrosion resistance and rust resistance. Even in harsh environments such as humidity, acidity, and alkalinity, galvanized angle steel can maintain long-term stable performance and extend its service life.

Another advantage of galvanized angle steel is its enhanced structural strength. The galvanizing treatment not only improves the anti-corrosion performance of the angle steel but also enhances its overall mechanical strength through the combination of galvanized layers. The metallurgical bond between the galvanized layer and the base metal makes the angle steel more stable and reliable when subjected to external forces such as pressure and tension. This makes it suitable for various structural systems that require high-strength support.

Technical Parameters:

Product Name	Galvanized Angle Steel
Shape	L Shape
Technology	Hot Rolled Or Cold Rolled
Application	Construction, Machinery, Shipbuilding, Etc.
Shipment	Container Or As Your Request
Length	4380mm, Customized
Production Capacity	5000 Tons Per Month
Surface Treatment	Galvanized
Technology	Hot Dipped
Name	Angle Steel
Quality	High Quality. Inspection

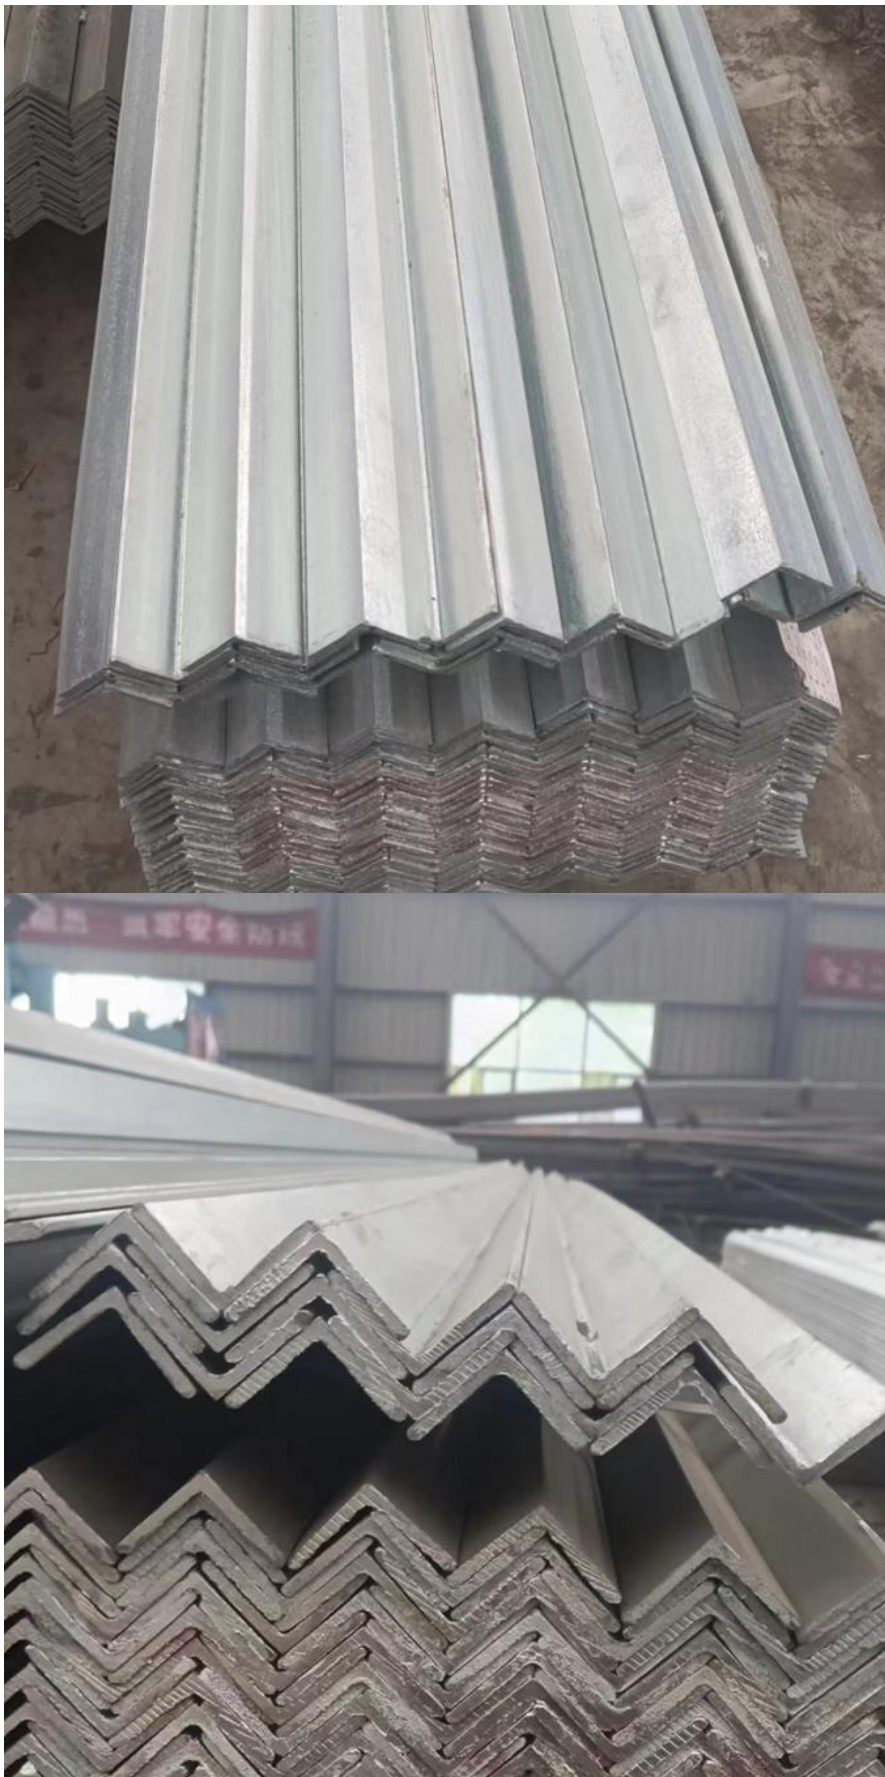

Applications:

Galvanized L-Angle Steel is a popular choice because of its excellent strength-to-weight ratio, corrosion resistance, and affordability. It is commonly used in structural applications, such as framing, bracing, and support systems, as well as in manufacturing equipment and machinery.

Slotted cold drawn angle steel is another popular variation of Galvanized L-Angle Steel. Slotted steel is ideal for applications that require a high level of customization, as it allows for easy attachment of other components and accessories. This type of steel is often used in the construction of shelving units, conveyor systems, and other types of storage and handling equipment.

Galvanized L-Angle Steel is available in a variety of lengths, including 4380mm, and can be customized to meet the specific needs of each customer. It is also available with a range of surface treatments, including galvanized, to provide additional protection against corrosion and wear.

Processing services, such as welding and cutting, are also available for Galvanized L-Angle Steel, making it easy to integrate into any project or application. Additionally, packaging details can be customized according to customer needs, and delivery times are typically 15-30 work days.

Packing and Shipping:

Product Packaging:

Galvanized Angle Steel will be packaged in bundles with steel straps.

The bundles will be covered with plastic and securely fastened to pallets.

A label with product details will be affixed to each bundle.

Shipping:

Galvanized Angle Steel will be shipped via truck or container.

The shipping method will depend on the quantity ordered and the destination.

Shipping and handling fees will be calculated and added to the total cost of the order.

Customers will be provided with a tracking number once the order has shipped.

FAQ:

Q: What is Galvanized Angle Steel?

A: Galvanized Angle Steel is a type of steel that has been coated with a layer of zinc to protect it from rust and corrosion.

Q: Where is Galvanized Angle Steel produced?

A: Our Galvanized Angle Steel is produced in Hebei, China.

Q: Is your Galvanized Angle Steel certified?

A: Yes, our Galvanized Angle Steel is certified with ISO9001.

Q: What is the minimum order quantity for Galvanized Angle Steel?

A: The minimum order quantity for Galvanized Angle Steel is negotiable.

Q: What are the payment terms for Galvanized Angle Steel?

A: We accept TT as payment terms for Galvanized Angle Steel.

Q: What is the price of Galvanized Angle Steel?

A: The price of Galvanized Angle Steel is negotiable.

Q: What is the delivery time for Galvanized Angle Steel?

A: The delivery time for Galvanized Angle Steel is 15-30 work days.

Q: What are the packaging details for Galvanized Angle Steel?

A: We package Galvanized Angle Steel according to customer needs.
